

LIGHT CONTROL SOLUTIONS

CASAMBI

**Comprehensive range of controls,**  
for integration in any type of building

## Light management solutions with the **Casambi system.**

### CASAMBI

We have always been an international benchmark for energy and lighting control, with a strong focus on electrical system design and safety. In line with this objective, as a global company, we have developed a partnership with **Casambi**, a leader in wireless lighting control solutions based on the **Bluetooth Low Energy** protocol.

Our objective is to offer the market a new solution for light management and to enhance the unique capabilities of each company through the partnership between **Vimar** and **Casambi**.

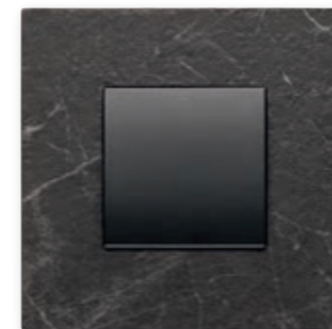

Vimar's comprehensive design offering allows for the selection of one of **4 different Made in Italy wiring series**, which can be paired with specific control devices for various technologies, including a wireless system with **Bluetooth Low Energy** technology, the **By-me Plus system** and **KNX systems**. A wide range of designs, shapes, materials, and technologies are available to offer versatile light control solutions that can easily be integrated with the Casambi system in various applications, including residential, hospitality, retail, office, healthcare, and marine environments.

**Explore the full range** of Vimar controls designed to control your lights with the Casambi system. Choose the **shape**. Choose the **finish**.

**Bluetooth®**

**by-me**  
smart automation

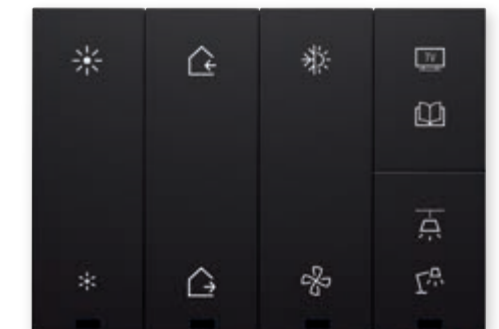

**KNX®**

Wireless controls

By-me Plus and KNX home automation controls

#### A world of possibilities, unique combinations

For easy control of lighting: on/off, dimming, all lights on/off, RGB/RGBW colour management, tunable white, and even lighting scenarios.

> **Move it** somewhere else if this is more convenient.

## Wireless and battery-free controls.

Freedom of installation and energy saving.

Our wireless, BLE (Bluetooth Low Energy) radio frequency controls feature an impeccable design Made in Italy that distinguishes Vimar's entire product range. Perfectly matching the Eikon, Linea, Arké, and Plana wiring series, they offer extensive customisation options in terms of shape, material, and colour, seamlessly integrating into any living space. An ideal solution also for renovations, redevelopments and furnishing updates, or any installations with regulatory or architectural constraints.

**Endless advantages. Easy installation, no cables. More control.**

> **Installation versatility.**  
**No maintenance required.**

The radio frequency control can be placed on any surface, such as glass, wood or on the wall.

> **Radio frequency, wireless.**

The working frequency (very low power emitted when the button is pressed) is Bluetooth, 2.4 GHz.

> **Battery-free.**

It is self-powered by the energy produced when pressing the buttons, with no need for batteries. This avoids battery disposal, while respecting the environment.

**Single wireless control,**  
choose the single or double button

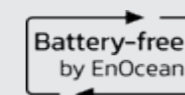

Bluetooth Low Energy  
radio control

Single button

Double button

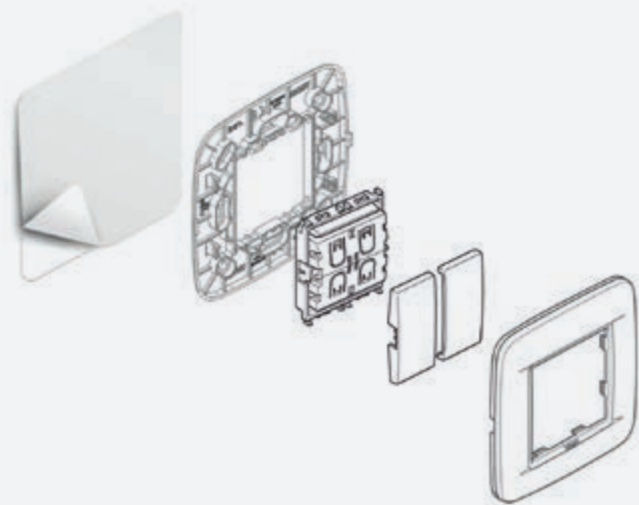

## Quick and easy to install

The wireless modular controls can be installed on standard flush mounting frames or can be placed almost anywhere, on glass or wood surfaces, using double-sided tape.

They ensure maximum installation flexibility, since there is no need for masonry work or having to repaint walls, and can therefore be moved if necessary.

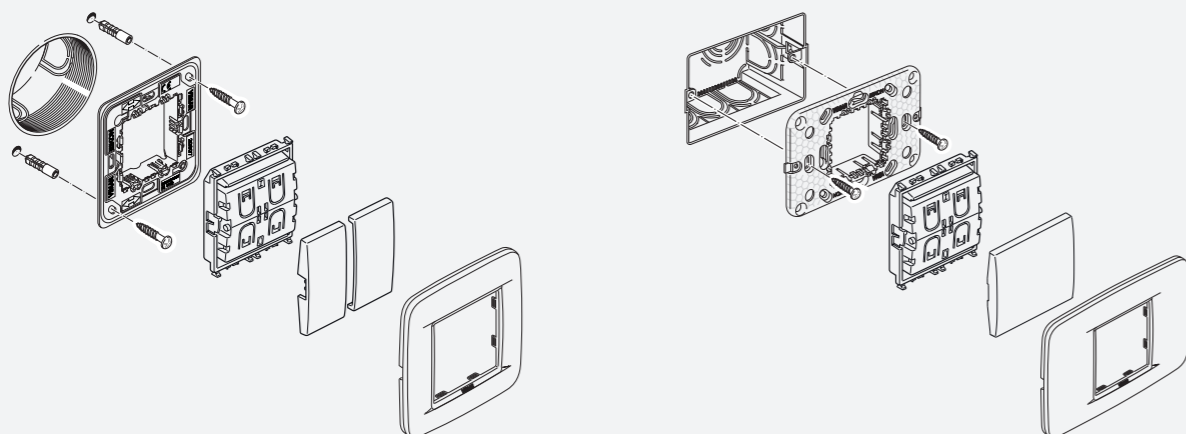

### Mounting on tape

Easily secure the radio controls in place using the double-sided tape provided for trouble-free installation in any desired location. They are perfect for existing electrical installations.

### Installation in flush mounting frame

Simply screw the square or round mounting box into the wall and the fixing frame screws onto the wall mounting box.

## Installation is wireless, making it ideal on any surface

**Vimar radio controls with Bluetooth Low Energy technology** can be applied **at any time onto any surface and in any point**: from glass to wood, ceramic to walls, and any type of material, they are easy to apply without requiring any masonry work.

### Customisable buttons, functions and cover plates

To be clear on the function associated with the control, the buttons are also customisable with symbols: a broad range of pictograms is available, identifying the main light management functions.

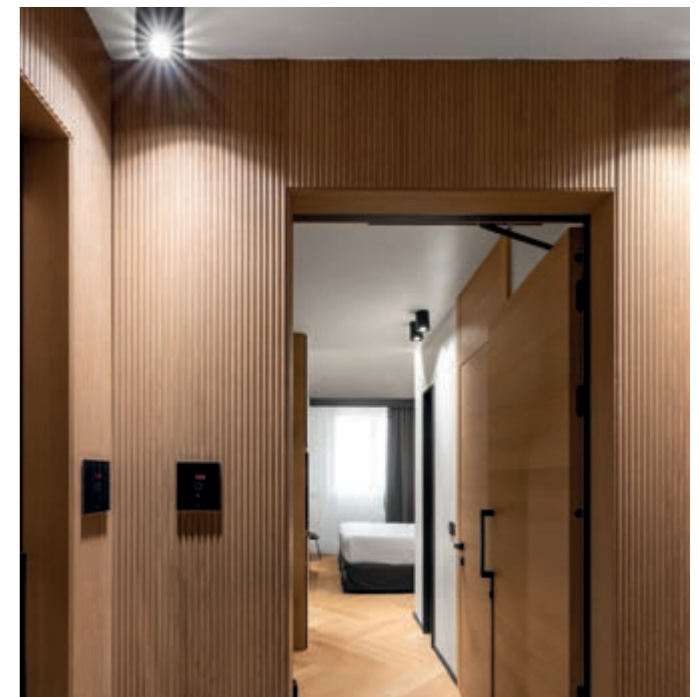

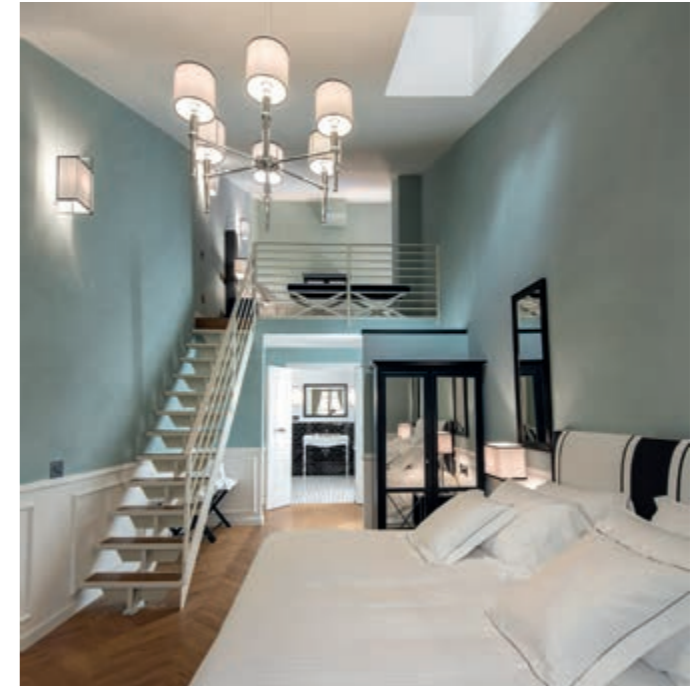

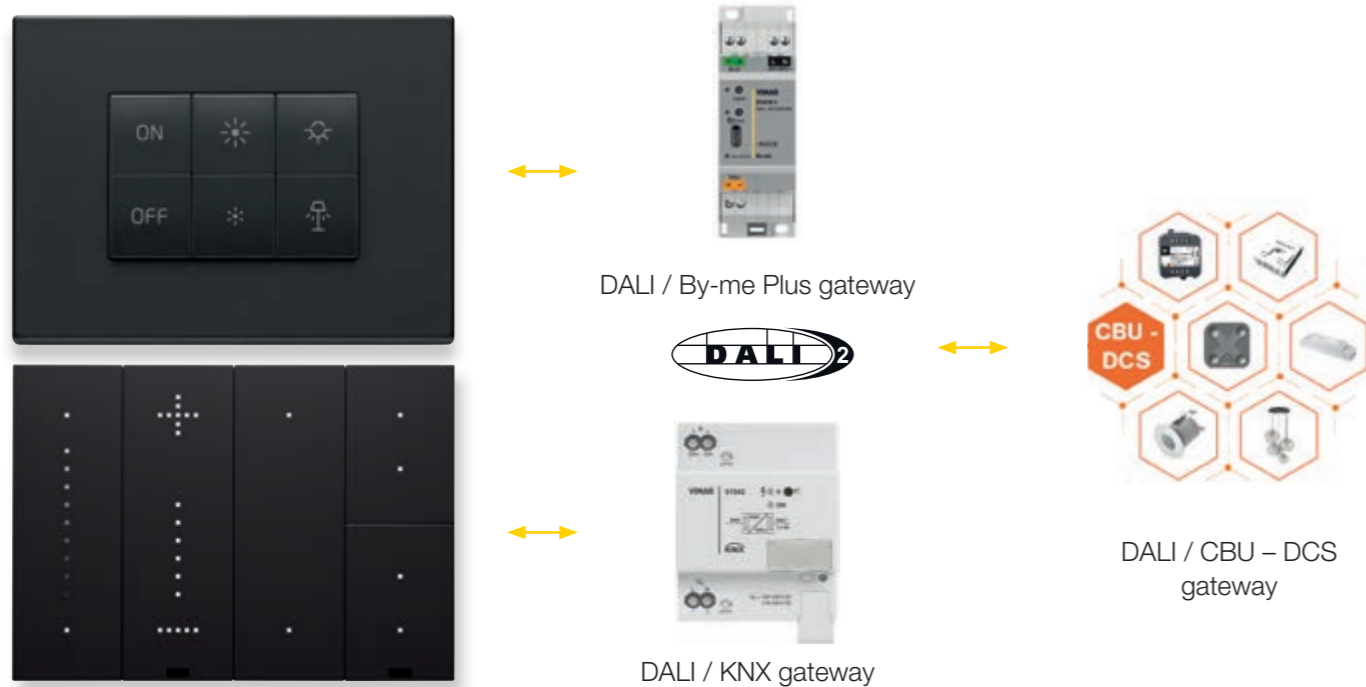

# A range of home automation controls with **By-me Plus** or **KNX** technology.

We offer a comprehensive range of home automation controls to choose from, each designed with advanced functions to give you complete control over your lighting: ON/OFF, dimming, colour change and creation of lighting scenarios. Choose between the Eikon, Linea, Linea with XT platform, Arké and Plana control series to have the right solution, whatever the setting.

## Maximum integration.

**By-me Plus** and **KNX technologies** can easily interface with the **Casambi system**: integration is based on a common language using the DALI system, through the By-me Plus or KNX interface and the Casambi interface.

**More advantages for the building manager and for the end user with Vimar's By-me Plus technology.**

Our Vimar View App allows end users to manage Casambi-enabled lamps within their environment effortlessly.

Home automation and building automation system to manage comfort, energy efficiency and security in any type of building, creating highly functional and customisable systems.

KNX systems and controls for complete, centralised management of every room in a building.

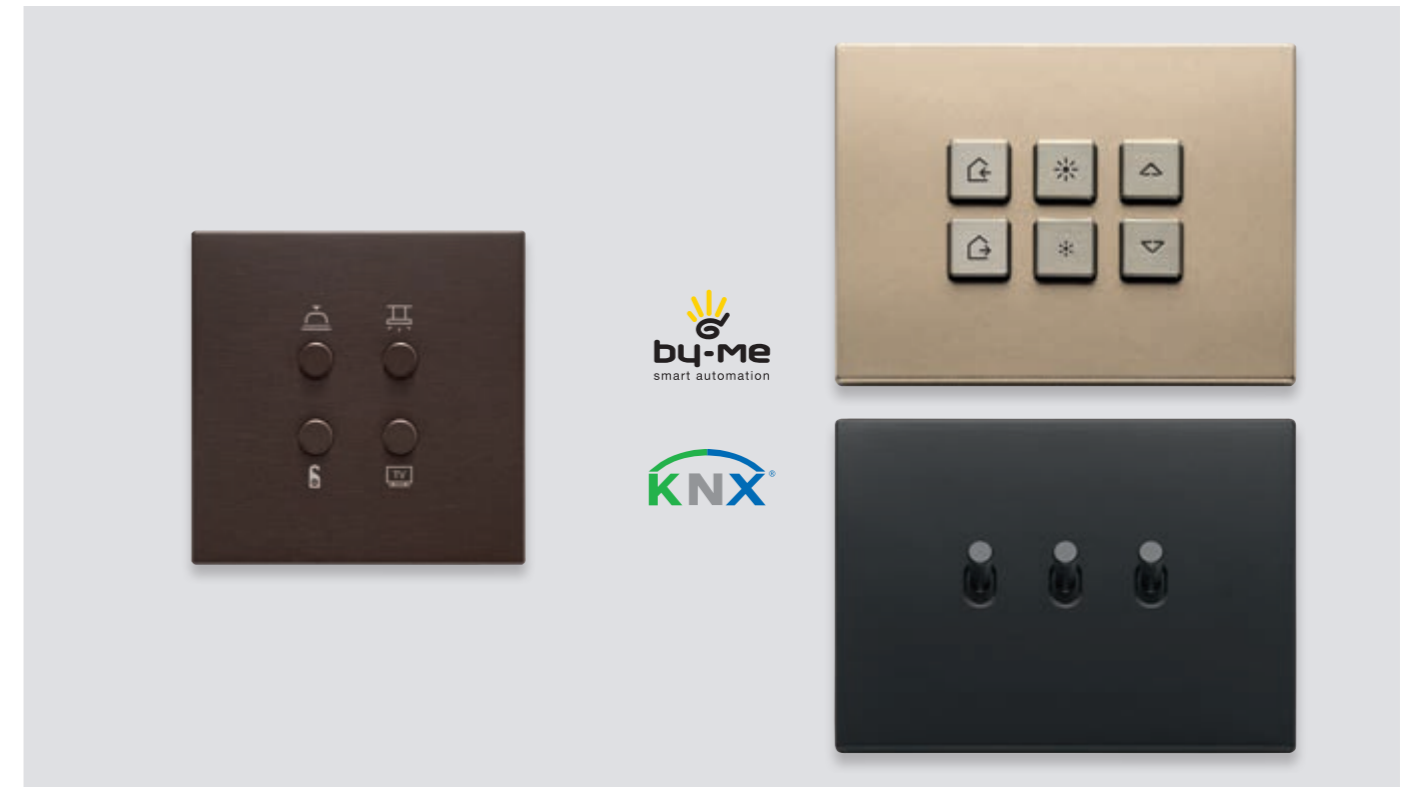

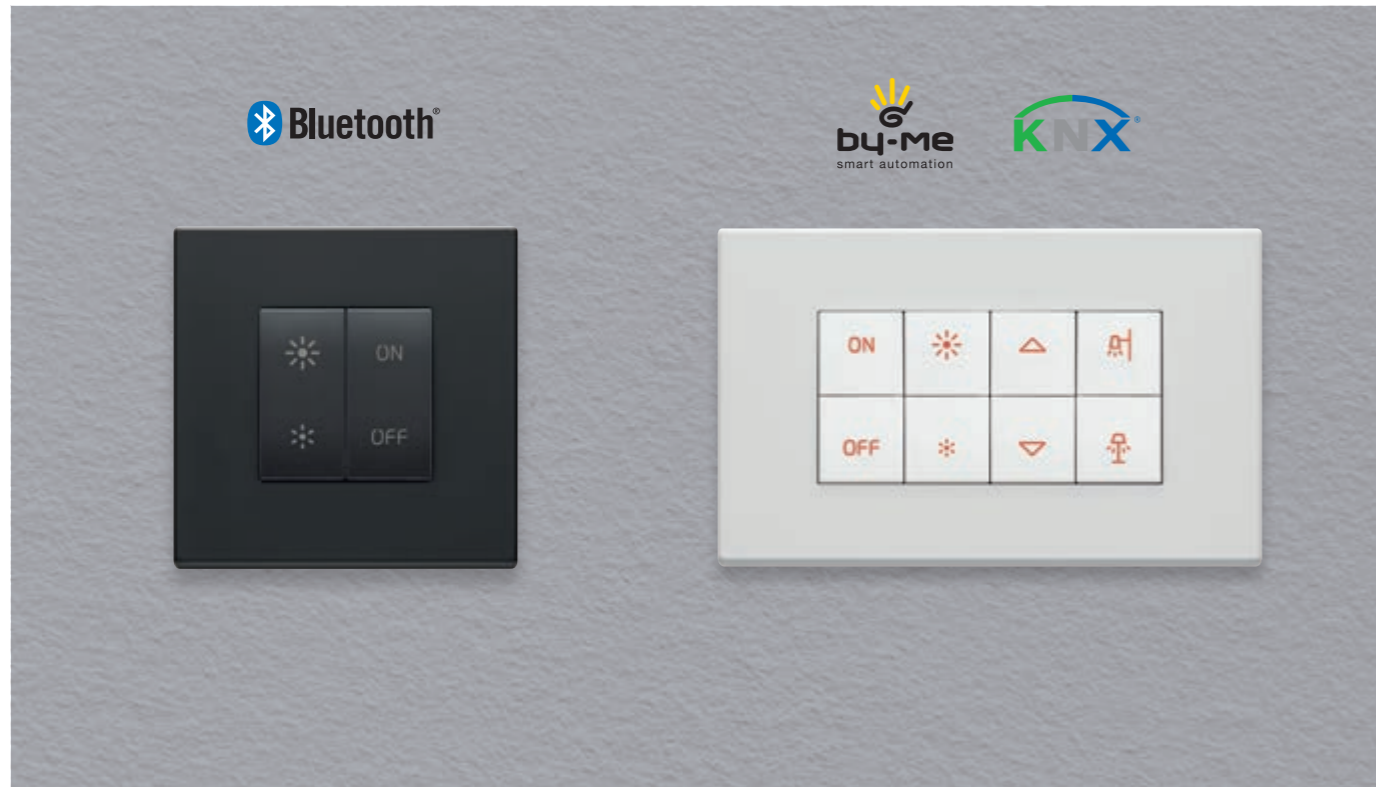

With Vimar, you're guaranteed a coordinated and fully integrated building control and management ecosystem, suitable for every type of building, from residential and hospitality to retail, healthcare, commercial, and even naval applications.

# Eikon Exé.

The essence of form and material.

Elegance embodied, creating a truly unique look. The possibility of choosing between prized materials and choice finishes, a versatile system featuring a modular design, which blends in seamlessly in any setting, creating an original look every single time.

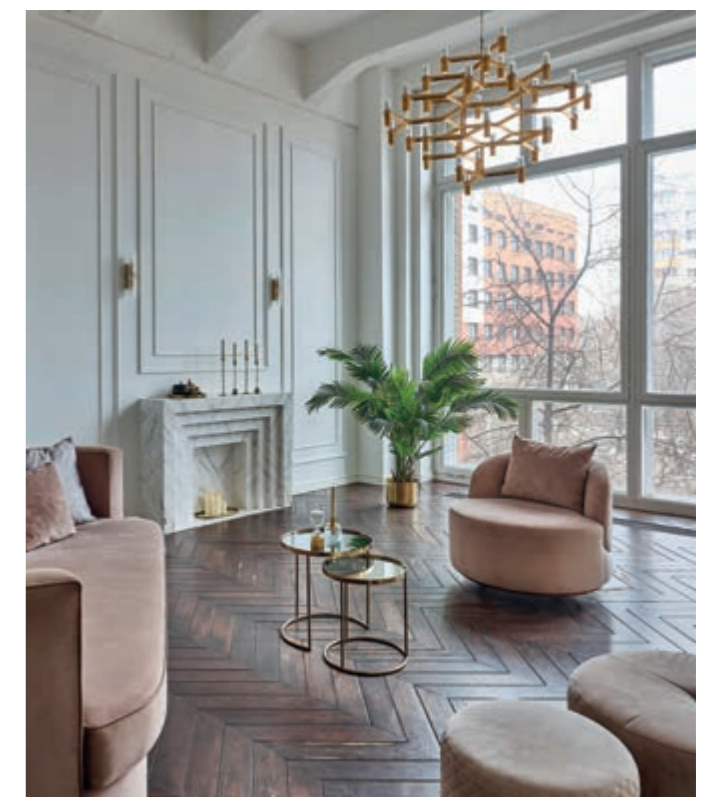

**Uniquely versatile for endless customisations**

The exclusive flair of Eikon Exé and its three design versions, Vintage, Flat and Tondo.

Prized materials provide an unmistakable textured effect: brushed and polished metals, glass and mirrors, leathers, stoneware and special materials to choose from.

An extensive symbol library to create an intuitive user experience. The controls are highly customisable.

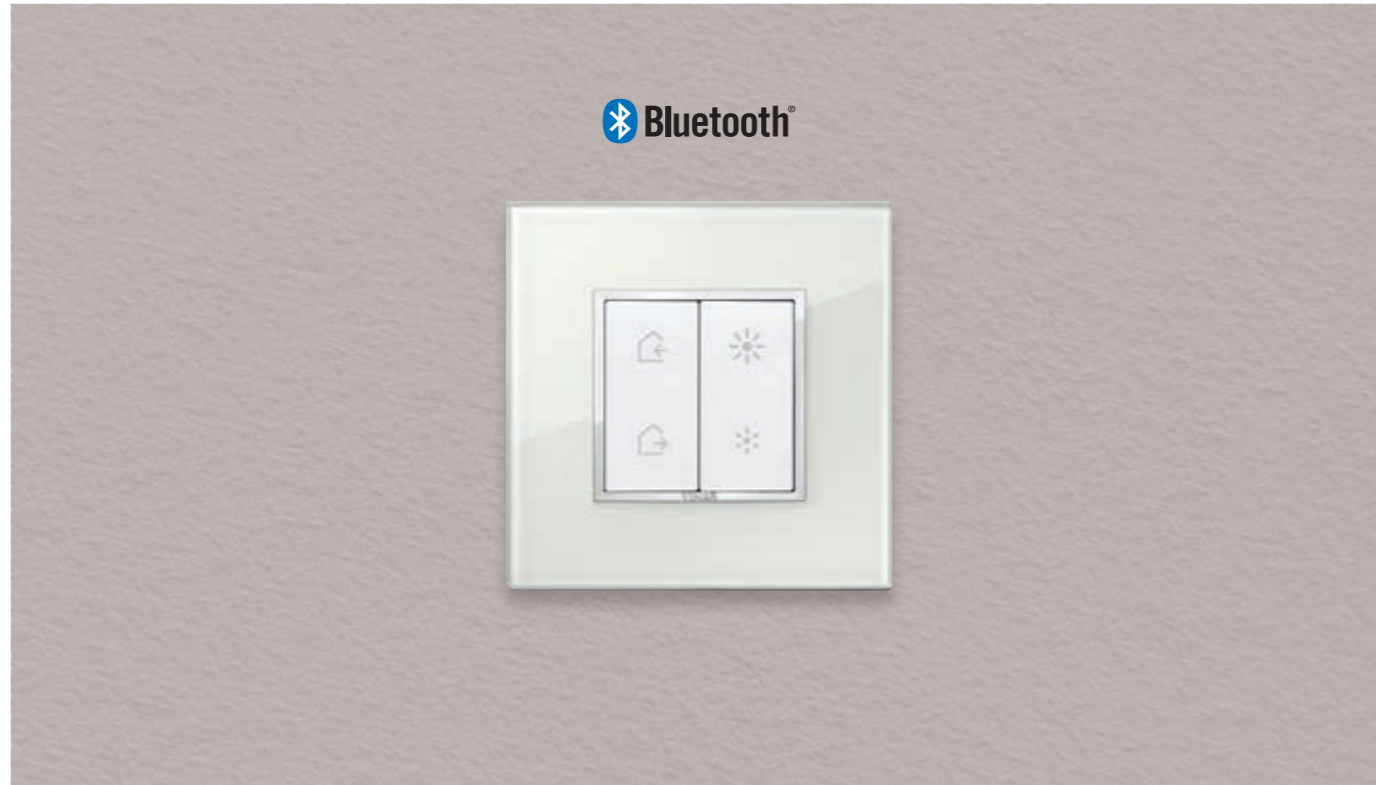

# Eikon Evo.

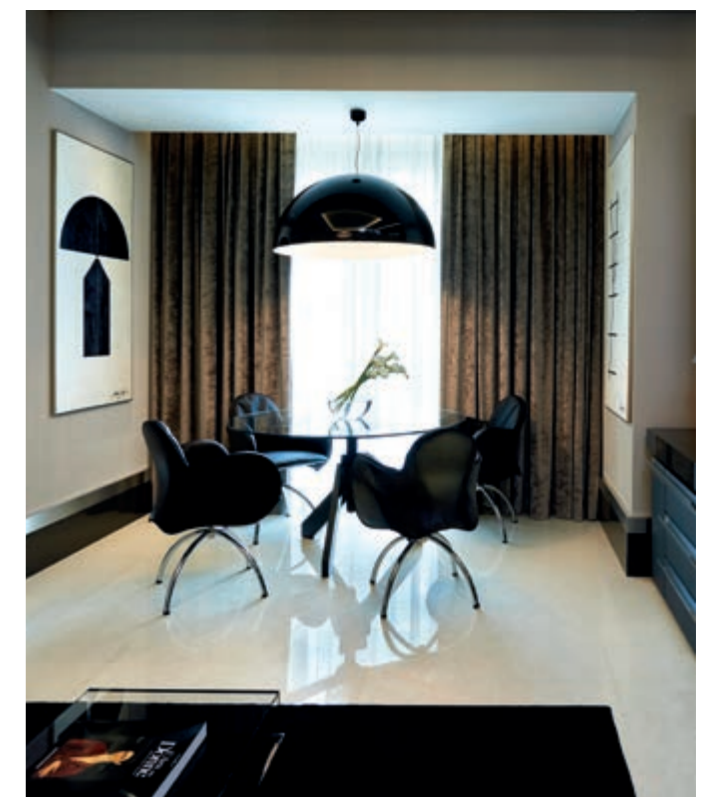

Refined, high-tech taste.

The design of Eikon Evo responds to the latest interior design trends and brings out the best of Italian style, offering a perfect match with the Eikon cover plates with Tactil control, which are distinguished by refined touch technology.

**Prized materials enhancing the shapes with marked elegance.**

An impeccable, light and minimal silhouette. Eikon Tactil is seductive at first glance, owing to the sophisticated touch technology, detecting your presence, anticipating your moves, lighting the controls. Décor item for exclusive interiors.

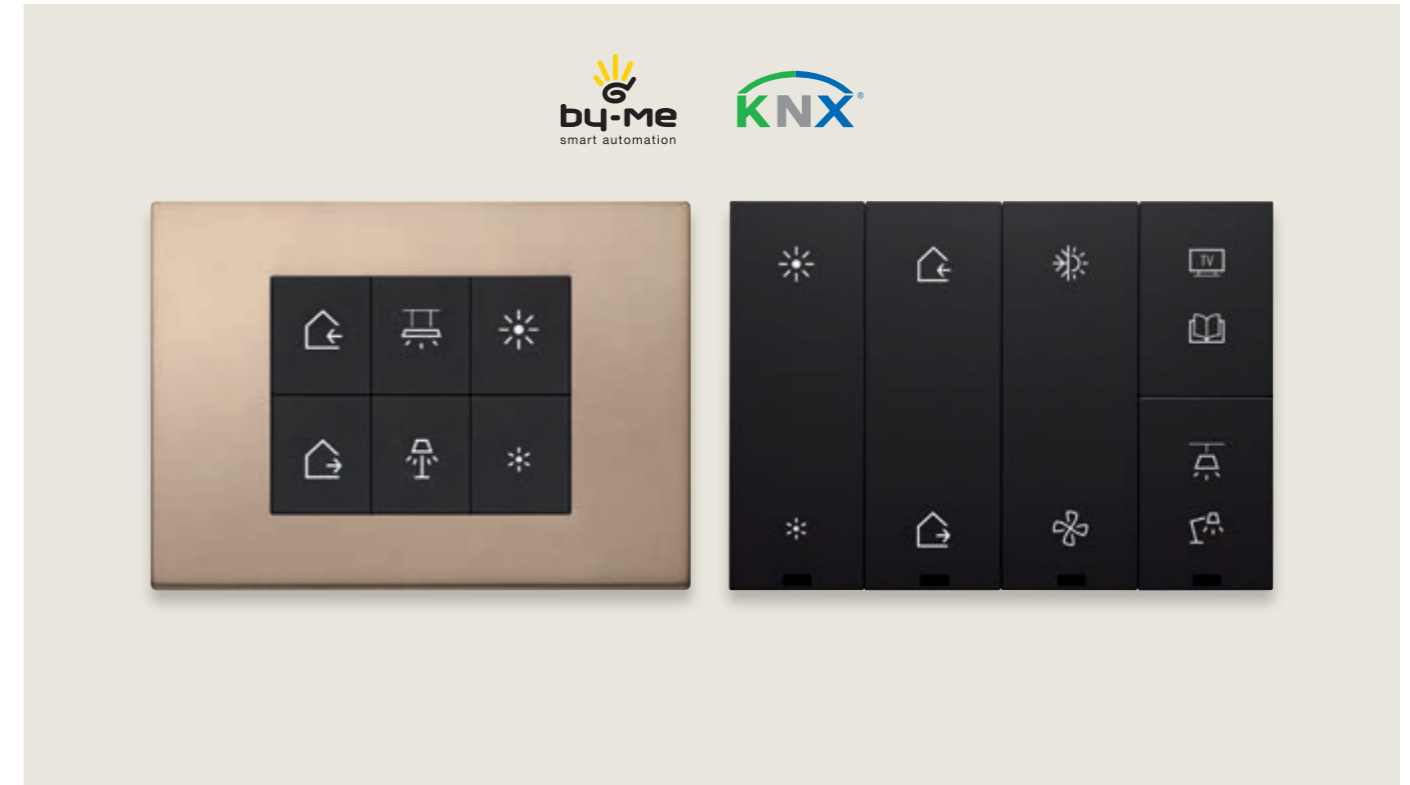

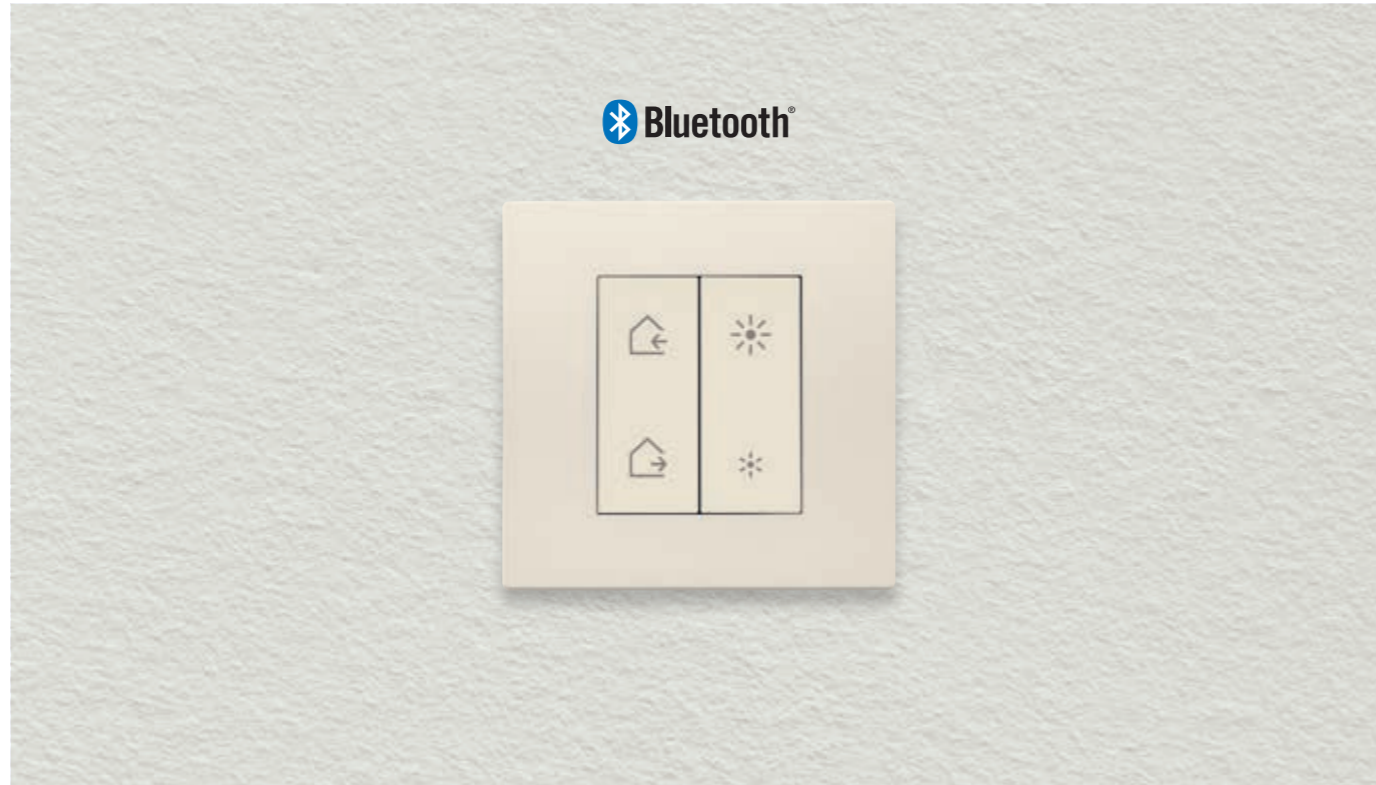

# Linea.

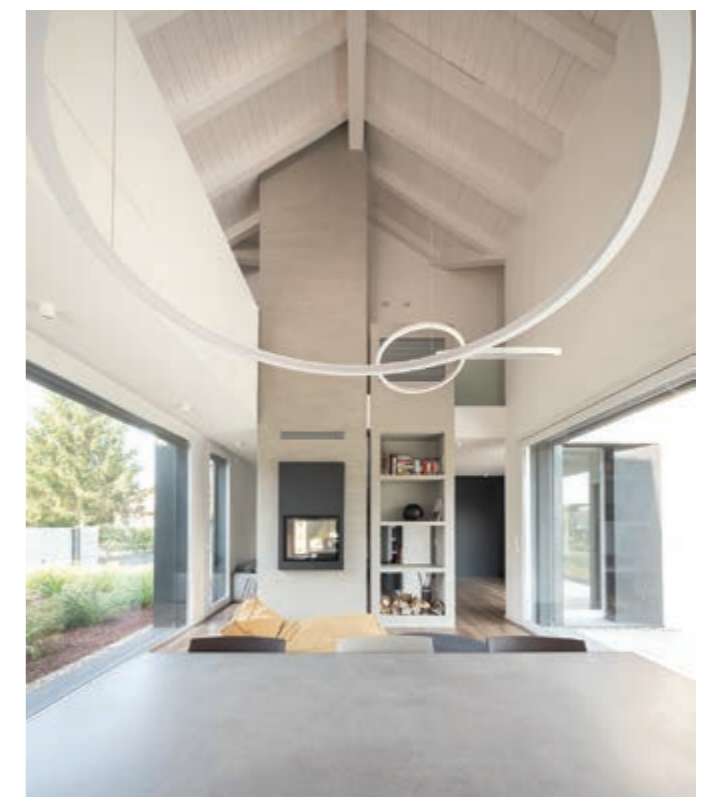

Unique line. Essential, intuitive and sustainable.

An unprecedented and elegant design, which brings together the understated allure of sophisticated styling with state-of-the-art technology. Designed to be sustainable, truly one of a kind, it replaces conventional fossil-fuel based plastics with plastics from recycled and renewable sources. **Linea is also digital with the innovative XT platform.** A high-tech experience for home automation systems.

**Impeccable coordination for an identity that stands out every time.**

Each customisation is reproduced in detail for lasting results and a further enhanced user experience. Dynamic LED icons which can be customised using the View App and laser-engraved graphic icons contained in a comprehensive and broad library of symbols, which allow you to identify the desired function.

## Arké.

A contemporary soul and a versatile style.

Simplicity and personality to enjoy spaces in the best of ways. A contemporary, functional and pragmatic style, this series reflects the right balance between character, expressiveness and care for details, with more design opportunities.

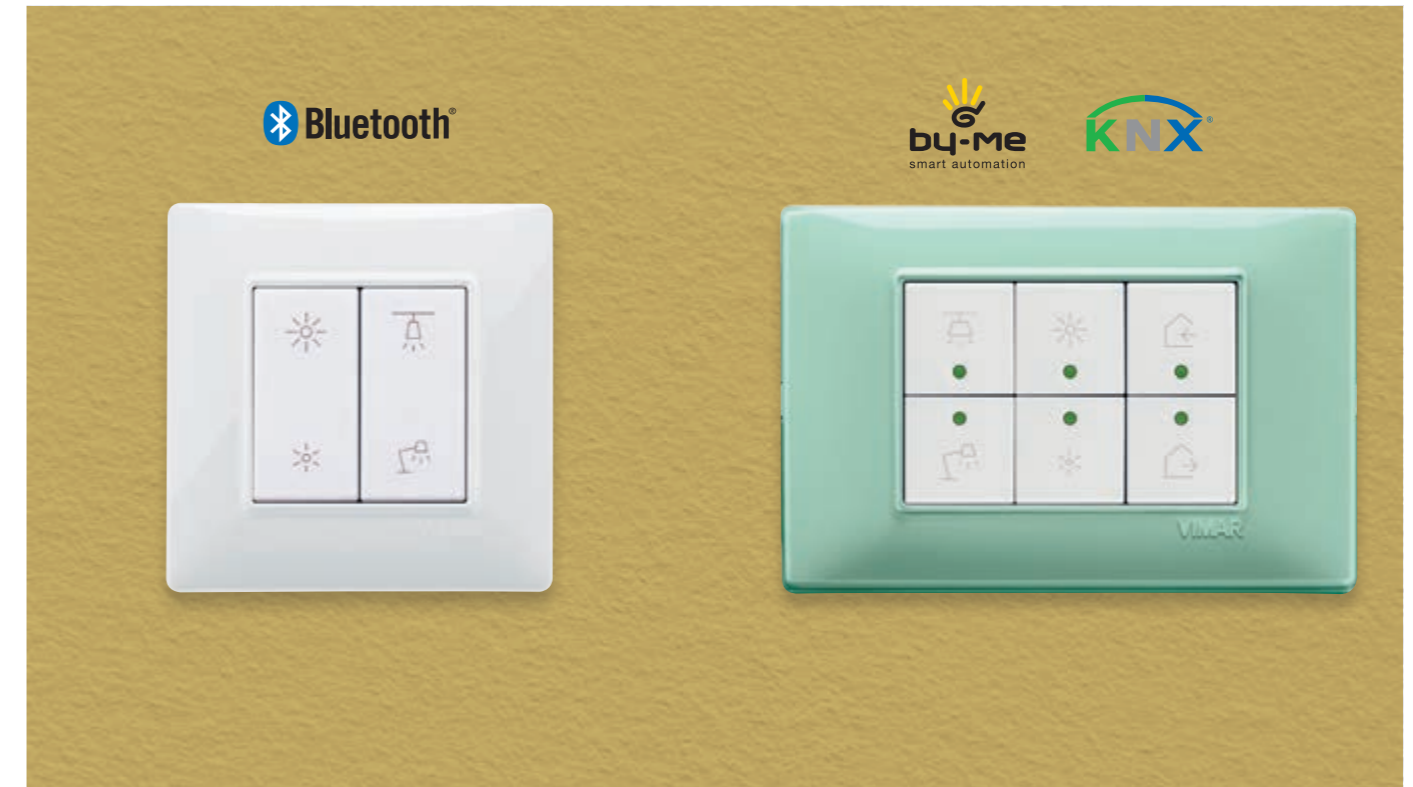

**Unprecedented details for bright interiors.**

Numerous colour combinations to enhance the personality of each space. From the absolute simplicity of the Total Look White to the Total Look Metal, to create perfectly balanced metallic effects combining pale and dark hues.

## Plana.

Essential and universal.

Simple, with soft and welcoming silhouettes, available in a versatile range of colours and materials for all kinds of combinations. Many variants to choose from, including the bright, ice-effect Reflex colours and metallic tones.

**Versatile range of colours and materials.**

Many variants to choose from, including the bright, frosted look Reflex colours and metallic tones.
