VIEW
IoT smart life

CONNECTED
PRODUCT

View: an ecosystem **of smart products and interconnected systems**.

View is a unique platform that includes connected systems and products for new builds, as well as for refurbishments or to modernise existing systems. It is a set of solutions designed for comfort, energy efficiency and security, with matching styling that fits into any architectural context.

Total integration, even with third party systems

Matching style and total **customisation** for the wiring series

KNX Works with IFTTT

Solutions for **comfort**, **security** and **energy efficiency**

DESIGN

INTEGRATION

CONNECTIVITY

Connected systems and **products** to ensure **maximum control**

VIEW
IoT smart life

Energy Efficiency

Security

SIMPLICITY

SERVICES

Integrated systems for a unique user experience

A **quality service** to support every customer every day

A single app: a unique experience and an **intuitive interface**, to manage, control and create scenarios, even remotely. You can integrate the App with the IFTTT platform to integrate third-party devices.
With the View app, you are always connected to your living spaces, wherever you are, and are always up-to-date on what is going on inside and outside the building.
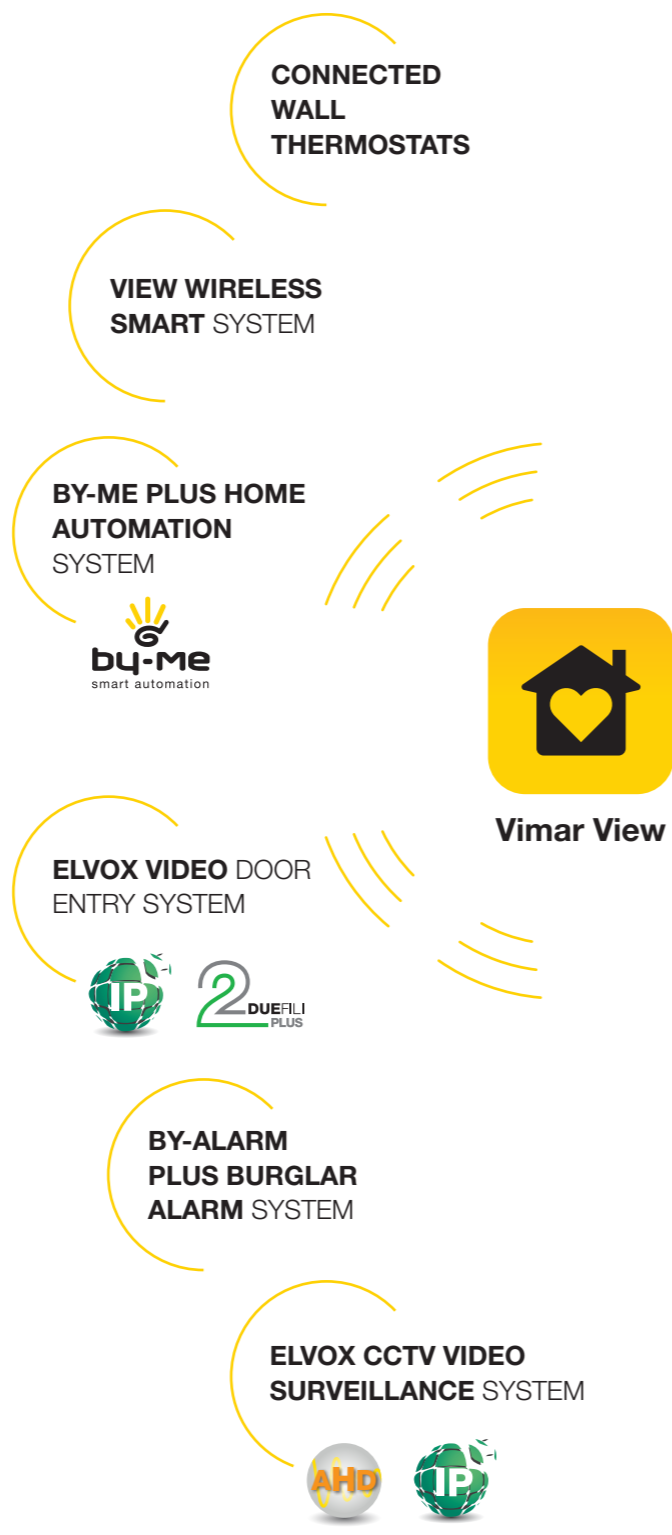

Vimar View
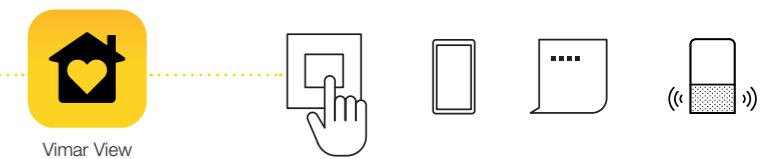

View App: new version, now also for connected video door entry system.

The **View** App has been updated to become the one and only App for managing Vimar's professional systems: **smart**, **home automation system**, **burglar alarm system**, **connected wall thermostats** and, as of today, with the **integration of the video door entry functions** for systems with IP and Due Fili Plus technology.

Used in combination with the new Tab 7S Up, Tab 5S Up and IoT video door entry Gateways, outstanding performance levels can be achieved.

Up to 5 different video door entry systems can be managed in complete safety, for instance, your main home, your holiday home, the office and your relatives' homes too. Calls can be forwarded to up to 10 different users. To enjoy life and get out and about freely and with peace of mind, without ever losing sight of what's going on in your space.

ELVOX VIDEO DOOR ENTRY SYSTEM

Vimar View

BY-ALARM PLUS BURGLAR ALARM SYSTEM

ELVOX CCTV VIDEO SURVEILLANCE SYSTEM

Multi-site

Up to 5 systems can be controlled with a single App.

My house | Seaside home | Office | Parents' house | In-laws' house

Multi-user

The video entryphone forwards the call to up to 10 users.

Luke | Anna | Mum
(3 users with a preview option)

Dad | Fred | Monica | Andrew
Mark | John | Alice

Multi-lingual

14 language versions: Italian, English, French, German, Spanish, Greek, Hebrew, Portuguese, Russian, Arabic, Turkish, Polish, Swedish, Dutch and simplified Chinese.

Multi-system

The **View** App manages and receives notifications from 5 different systems, with both Due Fili Plus and IP technology.

# **View App** means more functions and more control.

Very simple configuration.
In just a few steps, you can associate the View App with the video door entry functions of your system thanks to the use of intuitive wizards.

Vimar View

Intercom calls.
In addition to talking between two video entryphones in the same building, thanks to the View App - from each system manageable - you can also make calls to and from the associated mobile device. Immediate and direct dialogue with your home, but also with your loved ones who, if they need help, can call your smartphone directly from the video entryphone.
Opening the entrance gate.
When you're not at home, but you need to let someone onto your property, you can open the gate from your smartphone or tablet. Problem solved.

Activating auxiliary functions.
When on holiday or simply out and about, a simple tap on your smartphone or tablet will ensure your garden gets exactly the amount of water it needs, for instance; or you can open gates, garages and doors, turn on the lights in the garden or along the path.

Controlling all the cameras.
The video entryphone or smartphone and tablet give you round-the-clock control over all spaces, and you can keep an eye on things at all times. You can view the images of the cameras associated with the system or activate the video entryphone camera, without anyone ringing at the door.

Communicating is easy with
Elvox Video door entry systems.

Seeing what goes on outside the home, recognising those who ring our doorbell, even when we are out, are all crucial operations for living a quiet life. This is why we need access to sophisticated solutions based on innovative technology and a comprehensive range that can ensure safety and user-friendliness with a system that is simple to install.

High-performance technology to multiply solutions.
IP, SIP and **Due Fili Plus** technologies can be easily used to create even large systems, guaranteeing the highest performance in any type of building, from small homes to large residential complexes. High-performance systems that are capable of accurately meeting all building requirements.

**A wide range of different indoor stations and outdoor stations.**
An extensive selection of video entryphones, entryphones and outdoor stations for residential and service industry facilities. The products vary in dimensions, design, structure, type of system, smart and simple functions and various modes of installation.

TAB 4.3

VOXIE HANDSET

Due Fili Plus technology,
quick and flexible.

Due Fili Plus technology is used to create high-performing video door entry and door entry communication systems in all types of building, whether new builds or refurbishments, in the simplest possible way. Due Fili Plus technology guarantees faultless connections between all devices used for receiving and transmitting power, audio/video and data signals.

EXPANSION INTERFACE 1

EXPANSION INTERFACE 2

EXPANSION INTERFACE 3

EXPANSION INTERFACE MAX 32

Up to 6400 indoor stations.
Systems can be created to manage up to a maximum of **484 outdoor stations** and up to **6,400 indoor stations**. With the **expansion interface**, you can expand the system by replicating several Due Fili Plus systems with up to **32 blocks** and **128 reception video-switchboards**.

Up to 1200 metres.
Due Fili Plus technology can be used to create extended systems, with a distance between the indoor station and outdoor station of up to **1,200 metres**, **without losing any audio or video signal quality**. The signal is carried along a single, small-diameter twisted-pair cable.

Simple configuration.
Programming is really simple. The installer can programme the outdoor station directly from the indoor station. Once the indoor station has been encoded, the system can even simulate an audio/video call from the outdoor station, to check whether installation was successful straight away.

Scenario activation.
The **Tab 7S Up** and **Tab 5S Up** hands-free video entryphone systems have been integrated with new functions used to **activate scenarios in the View Wireless connected system**, thanks to rapid buttons on the front and the video entryphone menu. The scenarios you previously created and configured with the **View** App are imported into the video entryphones via the Vimar cloud. The update is also available for the Tab 5S Up and Tab 7S Up video door entry systems already installed and connected to the Internet.

Remote management by smartphone and tablet.
The restyled **View** App enables remote video door entry system management via smartphone and tablet in combination with the **Tab 7S Up** and **Tab 5S Up** video door entry indoor stations. It allows you to receive a video entryphone call, see the video surveillance cameras or open your door wherever you are. What's more, it allows you to manage up to **10 mobile devices** and up to **5 different systems**.

Professionalism guaranteed.
Our professional, technologically sophisticated products are designed to guarantee superior performance and durability. Famed for their top quality, they are **guaranteed for three years**, a whole year more than the legal requirements.

Solutions for any building.
Our video door entry system solutions adapt to the most diverse application environments. Versatility and scalability, combined with sophisticated technology and ease of use make our products suitable for the smallest apartment to large shopping centres and executive compounds, through to large industrial estates.

IP Technology, a limitless system.

A system based on IP technology enables it to go beyond the limits of traditional video door entry systems: enhanced performance levels, multiple audio/video communication between indoor stations and outdoor stations and a potentially infinite number of users. All this is made completely simple, also through the use of existing LAN networks, without laying any specific wiring.

LARGE BUILDING COMPLEXES

INDOOR STATIONS

POE SWITCH

RECEPTION

OUTDOOR STATIONS

ENTRANCE
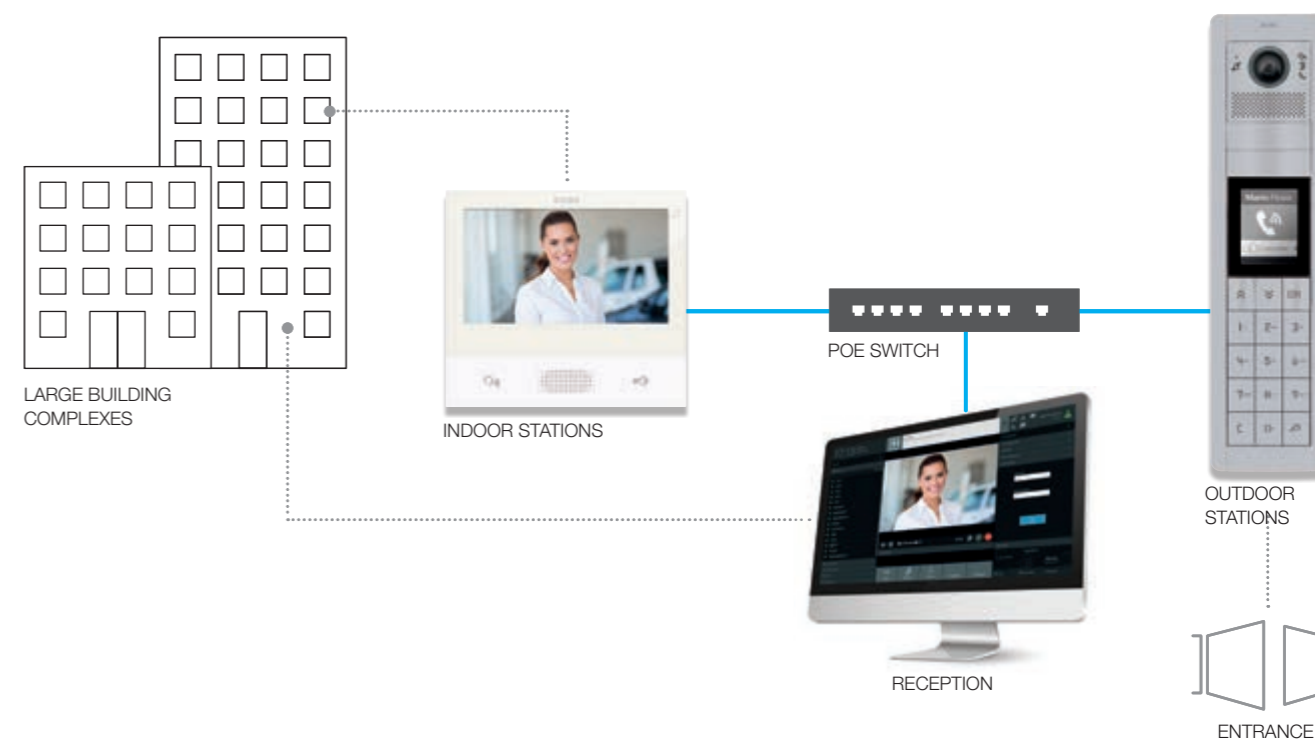

Incomparable expansion.
With IP technology, the video door entry systems can be expanded to include a large number of users. Expansion is as easy and simple as initial installation: quick and functional, also through the use of dedicated or existing shared LAN networks, where present.

Full coverage.
Performance is enhanced, and audio and video signal quality is guaranteed and protected, whatever the size of the building complex. For efficient, high-performance communication.

Simple configuration.
Self-configuring for kits, or configurable using the Video Door IP Manager software from a PC for all installations, from the simplest to the most complex, all made simple by the autodiscovery function for Elvox IP video door entry system devices. Installation is always quick and functional, supporting the needs of professionals.

Remote management by smartphone and tablet.
The restyled **View** App allows you to receive a video entryphone call, see the video surveillance cameras (if any are connected) or even open your door directly from your smartphone or tablet, wherever you are.

Guaranteed reliability.
The system data is replicated on the different devices, ensuring constant system operation. Everything is always under control efficiently and securely. Thanks to the new **IP Gateway** you can intervene remotely on the outdoor station operating parameters and manage the access control credentials.
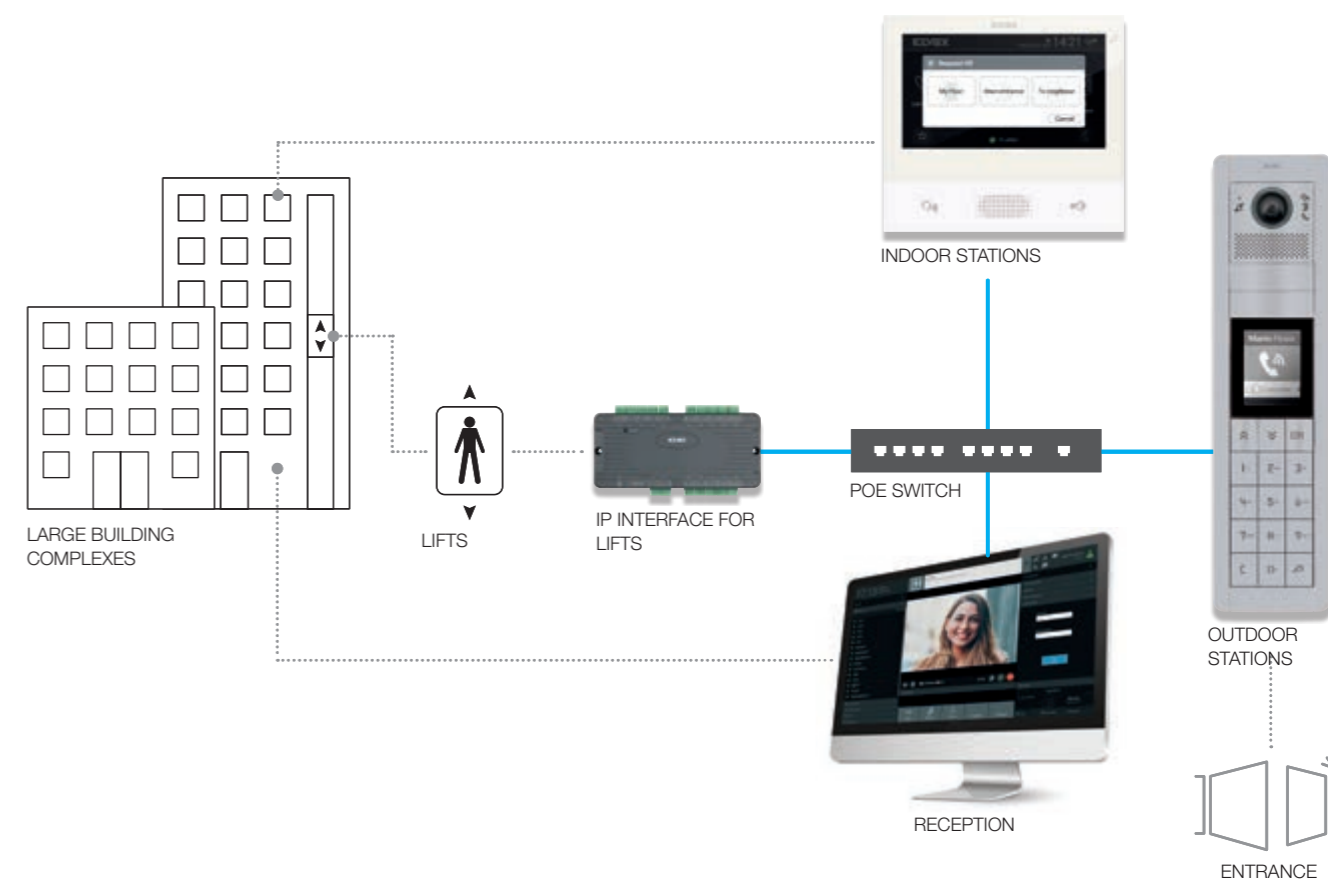

Scalability and versatility.
The IP video door entry system was designed to respond in the simplest way to the needs of all kinds of buildings and their growing needs.

Controlling lifts in systems with IP technology.

New lift interface for IP video door entry systems with Ethernet network infrastructure. In response to the actions of the user or reception switchboard, it allows lifts to reach the desired floors based on certain system events (e.g. door opening following a call to the apartment, access via badge or keypad code, call from indoor station or switchboard).

INDOOR STATIONS

LARGE BUILDING COMPLEXES

LIFTS

IP INTERFACE FOR LIFTS

POE SWITCH

OUTDOOR STATIONS

RECEPTION

ENTRANCE

Applications.
The lift control interface is designed to extend the functions of the video door entry system, allowing: the lift to be called from the indoor station, access to reserved floors by way of user recognition via code or badge, "No visitor on the wrong floor" limited and controlled visitor access and lift management from reception.

Expandability.
Up to 16 interfaces can be connected in the same system, powered by the Ethernet network via PoE technology. Each interface has a matrix with 16 relays which can be controlled individually, for a total of 256 relays.

"Fire switch" safety.
The interface can be connected to the fire alarm system, to switch off when the alarm is triggered and reactivate once the alarm has been silenced, to return to its normal operation.

Simple configuration.
The interfaces are configurable using the Video Door IP Manager software from a PC for all installations, from the smallest to the most complex, all made simple by the autodiscovery function for Elvox IP video door entry system devices. Installation is always quick and functional, supporting the needs of professionals.
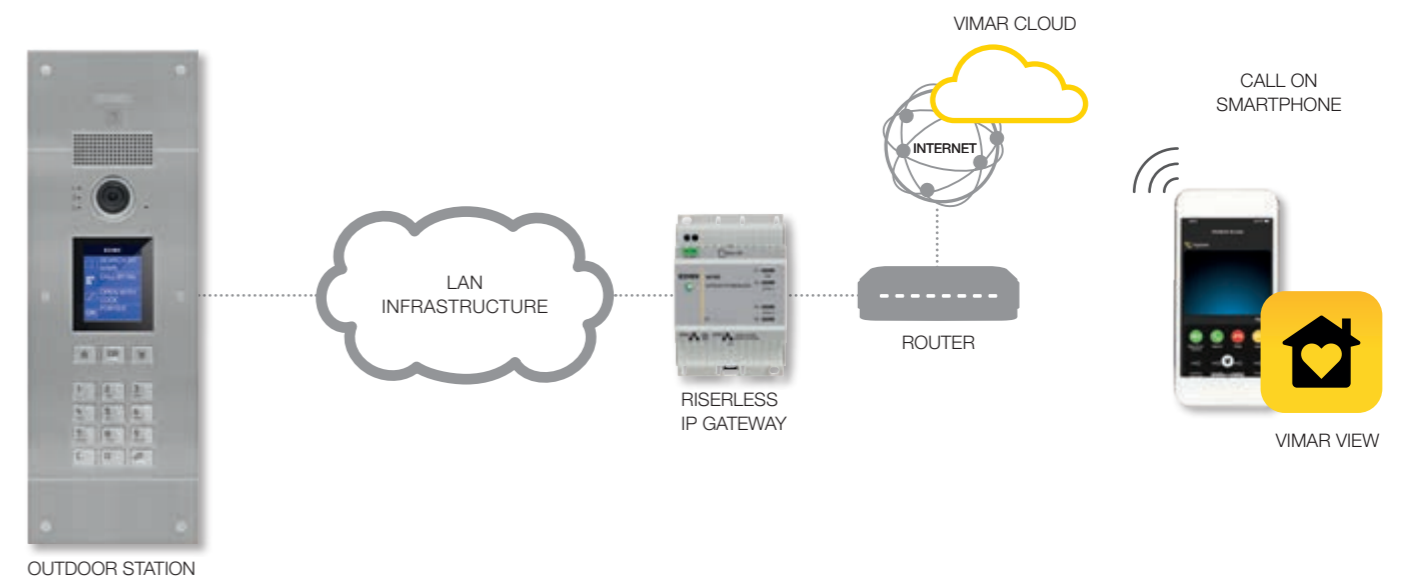

Indoor stations and reception switchboard.
The Tab 7S IP, Tab 7 IP hands-free video entryphone and the IP reception switchboard have been integrated with new menus to manage new functions for lift calls.

Riserless IP technology,
with call service via Cloud.

Video door entry systems with riserless IP technology forward directly the video door entry calls from the outer unit to the smartphone by **View** app, without the need for a physical internal unit in the apartment. This is possible because a gateway and a licenses kits for audio / video calls have been installed.

VIMAR CLOUD

CALL ON SMARTPHONE

LAN INFRASTRUCTURE

ROUTER

RISERLESS IP GATEWAY

VIMAR VIEW

OUTDOOR STATION

Up to 1600 calls.
In the same IP system, it is possible to install up to **16 riserless IP gateways**, each gateway can manage calls **from 100 apartments** and up to **5 mobile devices** (e.g. smartphones) per apartment, which can simultaneously receive the same call.

Call licenses.
Loading the licenses into the riserless gateway, it allows the audio / video calls from outer units to mobile devices by **View** app.

User remote control with smartphone and tablet.
The **gateway** and **View** app allow the following video door entry functions from mobile devices: receive calls, activate the outer units or a CCTV camera from smartphone, activate the outer unit lock, activate auxiliary services, communicate with the porter switchboard if present, send and receive text messages from the porter.

Plant manager remote management.
The registrations and access credentials of users and apartments are managed by the system administrator through **View Vimar portal** that enables remote management of multiple systems.

Guaranteed reliability.
The system data is replicated on the different devices, ensuring constant system operation. Everything is always under control.
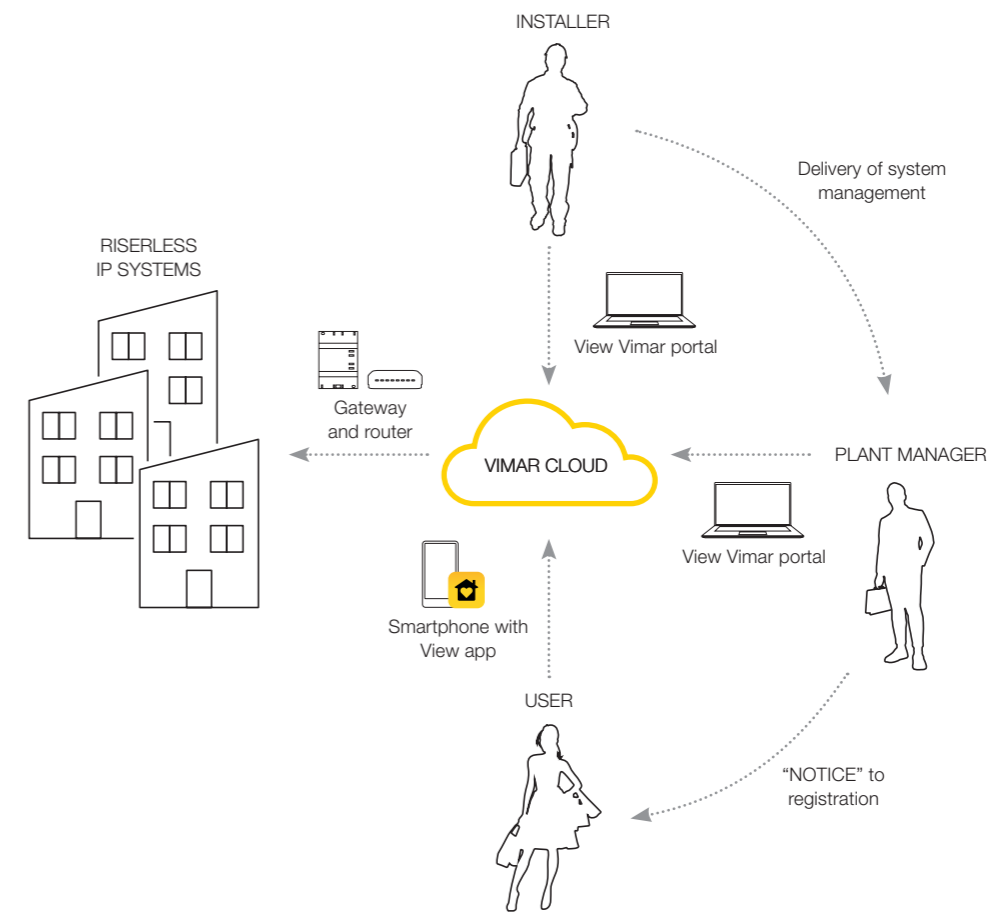

Scalability and versatility.
The IP video door entry system was designed to respond in the simplest way to the needs of all kinds of buildings: from single homes to large residential complexes.

View Vimar portal,
for the management of riserless IP systems.

The management, configuration and use of riserless IP video door entry systems takes place through a new dedicated Web portal and some specific person, which interact with the system: plant manager, installer and user.

"NOTICE" to registration

ADVANTAGES

Installer.
The installer can offer solutions to replace "old" intercom systems with smart video door systems (retrofit of multi-wire audio system), without removing the existing cables in the riser. The new cabling will be reserved only for the horizontal IP backbone between the entrance panels, IP cameras, IP input / output devices and Ethernet switches.
From the new View Vimar portal, the installer can remotely interact with the systems for maintenance and management of access permissions.

Plant manager.
The plant manager can remotely supervise multiple systems, give administration roles of single systems to other operators, manage user data, send via e-mail to users the request for registration to the system, send general messages to users, enable and disable user system credentials, manage access control credentials and manage the licenses assigned to single system.
To each license can be associated up to 5 mobile devices, which answer simultaneously to the same calls.

User.
Users with smartphones and View app can use the following video door entry functions: answer entrance panel and porter switchboard calls, activate the door lock and auxiliary services (switch on staircase lights, garden irrigation, etc.), switch on the entrance panel, view the video surveillance cameras (if connected), communicate with the porter switchboard if present, send and receive text messages from the porter.
Each user can simultaneously receive calls on 5 different mobile devices, for each member of the family.

SIP technology,
Session Initiation Protocol,
for a multimedia communication.

SIP (Session Initiation Protocol) is the most commonly used protocol in the VoIP telephony business market. It is used to create audio or audio-video communication sessions between one or more participants. These sessions include Internet phone calls (VoIP).

SIP 7" INDOOR STATIONS

VoIP

SIP DEVICES

SIP OUTDOOR STATIONS

Compatibility.
The range is compatible with the products of world leaders in the VoIP telephony sector.

Installation context.
Suited for solutions in any context where there is a SIP server.

Simple configuration.
Commissioning can be done simply from any browser, connecting to the WEB server of the device, without the need for specific software.

Call scenarios.
- Call to a SIP audio device.
- Call to a SIP audio/video device, with or without preview depending on the features.
- Output activation via DTMF.

Software licences.
- They enable calls from the entrance panel to one or more SIP audio devices.
- They enable calls from the entrance panel to one or more SIP audio/video devices.

Indoor stations, communicate with the outside world, by home and even remotely, in total safety.

The **indoor video door entry system** stations - hands-free or with a handset - stand alone or integrated in the By-me Plus home automation system, feature exquisite, modern, prized finishes and are thinner than traditional devices. The full range of indoor stations, both for door entry and video door entry systems, designed to elegantly adapt to the widest range of living styles. Top-quality materials, stylish silhouettes, prized finishes for functional styling and totally user-friendly operation.
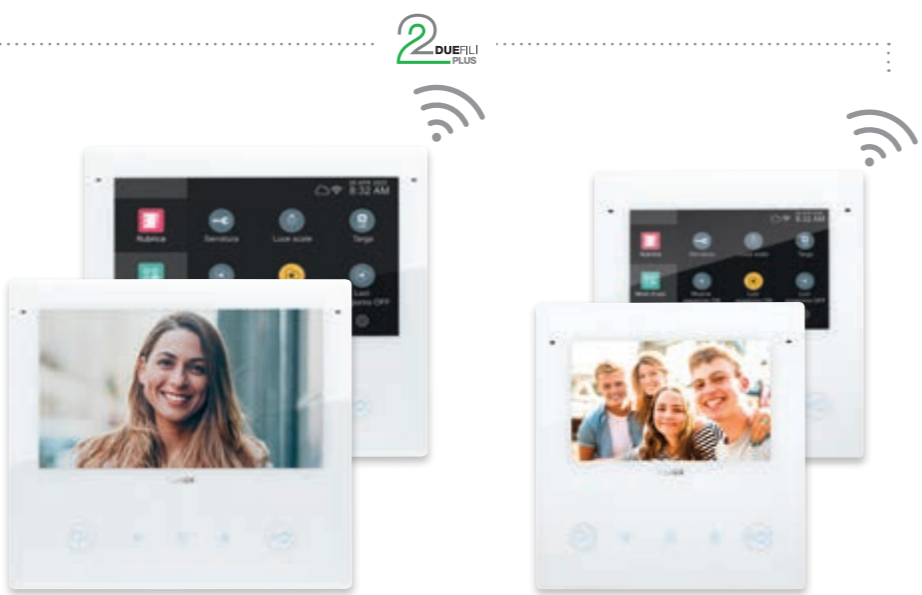

Tab 7S Up and **Tab 5S Up.**
With integrated Wi-Fi and 7" or 5" touch display, in Due Fili Plus technology. Light, sleek and sophisticated, easy to use and programme, in constant dialogue with the View App via smartphone or remotely. Integrated with new functions allowing the activation of scenarios in the View Wireless connected system. In versions with black and white glass cover.

Tab 7S and **Tab 7.**
Inspired by the light weight and understated silhouettes that distinguish all the models in the Tab series. The Tab 7 video entryphone is available for IP and Due Fili Plus systems, while the Tab 7S with integrated Wi-Fi for IP systems, as well as the traditional video door entry functions, offers call repetition on your smartphone, thanks to the View App, guaranteeing total control even when you are out and about.

Tab 4.3 and **Tab Free 4.3.**
With 4.3" display and slim profiles. Tab Free 4.3 is designed to communicate with the outside in complete freedom while keeping your hands free and providing a generous view of the world outside your home. A compact and stylish video entryphone, with gentle silhouettes that soften the corners and extend across the entire smooth, glass-like surface.

Tab jr. and **Voxie.**
Entryphones with handset or hands-free. Simple, for those seeking the basic essentials both the silhouettes and in the functions, devised for those who don't need the video function and they blend in with any lifestyle.

INDOOR STATIONS
Tab 7S Up and Tab 5S Up, connected video entryphones.
## Ease and safe communication.

The video door entry indoor stations are renewed with two important innovations, ideal for renovation or new buildings. Functional and connected, they can be managed remotely thanks to the View app, very easy to program and install.

TAB 7S UP
7" touch display

Integrated Wi-Fi

Touch screen

Slim profile.
Surface mounting or semi-flush mounting, affording minimal protrusion from the wall (13.1 mm), thanks to the dedicated mounting box for masonry and hollow walls.

Finishes: white and the new black.
Black and white glass cover, to adapt to various décors with elegance.

High resolution display.
The colour display frames a high definition image of who's ringing at your door, 1024 x 600 pixels for Tab 7S Up and 800 x 480 pixels for Tab 5S Up.

User-friendly graphic interface.
Smart menu with scrolling pages and selectable black or white background.

Capacitive keyboard.
Touch controls with intuitive icons and LED backlighting.

Optical and acoustic signalling.
Crystal-clear sound and visual feedback confirm the activation of the functions, facilitating use for the visually impaired or hearing aid wearers too.

Integrated Wi-Fi.
With Wi-Fi it is possible to manage your calls via the restyled View App.

Vimar View

Hi!
I've just popped out,
I'll be right back

INDOOR STATIONS
Tab 7S Up and Tab 5S Up can also be used to activate View Wireless scenarios.

The **Tab 7S Up** and **Tab 5S Up hands-free video entryphone systems** have been integrated with new functions used to **activate scenarios for previously created View Wireless systems** configured with the **View** app. The update is also available for the video door entry systems **already installed** Tab 5S Up and Tab 7S Up and connected to the internet.

INDOOR STATIONS
Tab 7S and Tab 7.
Light weight and understated silhouettes.

In addition to traditional video door entry functions, Tab 7S with integrated Wi-Fi and View App allows call repetition on your smartphone, ensuring total control even when you are out and about.

TAB 7S
7" touch display

TAB 7
Display da 7"

Integrated Wi-Fi   Touch screen   View App

TAB 7S

Tab 7S, with integrated Wi-Fi.
Communicates instantly with smartphones and tablets via the View App. Just tap once to answer video entryphone calls from any room in the home, with complete freedom of movement: receive calls from the entrance panel, make intercom calls, release the lock, activate auxiliary services, switch on the stair lights, start the irrigation system, send and receive text messages or consult recorded messages.

Extra high resolution 7" display.
The LCD colour display offers a magnificently large and well defined image: 7" with 800x480 pixel resolution.

Capacitive keyboard and touch controls.
Flush capacitive buttons, in keeping with the minimal design of the entire device. The Tab 7S model also offers the touch screen function: fast and sensitive, this allows the user to activate controls simply by touching the display.

No-nonsense speaker.
To achieve a sound system as clear and free of disturbance as possible, voice reproduction is always faultless.

White, glass effect.
Selected to blend in with any interior décor, used for the special "glass effect". The effect is sparkling, like glass, and creates artful suggestions of transparency.
Teleloop.
So that hearing aid wearers can also use the system; with tactile aids designed to facilitate operation of the controls by persons with impaired vision.

TAB FREE 4.3

INDOOR STATIONS
Tab Free 4.3.
Compact video entryphone with a stylish silhouette.

Tab Free 4.3 with 4.3" colour display and capacitive keyboard, is designed to communicate with the outside in complete freedom while keeping your hands free and providing a generous view of the world outside your home. A compact, stylish video entryphone supplied of many functions and signallings for the call management. The gentle silhouettes soften the corners and extend across the entire smooth, glass-like surface.

OSD scrolling menu.
The user can easily access the OSD scrolling menu from the display, to customise the video entryphone settings. The installer can also configure the advanced functions of Tab Free 4.3 on the OSD menu.

No-nonsense speaker.
Its generous dimensions stand out on the video entryphone for an audio output as clear and free of disturbance as possible, for perfect, high-quality sound.

10 different ringtones.
10 different default melodies to choose from: simply select your favourite and adjust the volume according to your requirements and the application contexts.

Professional firm function.
Setting this function in Tab Free 4.3 allows the lock to be released automatically following a call from an outdoor station.

Pan & Zoom function.
You can check the recording range of the outdoor station video camera which features the same function from the video entryphone.

Alert notification.
The video entryphone can be used to configure one of the hotkeys on the front so that, when activated, users can send priority requests for support to the porter's lodge.

Accessibility.
Equipped with a teleloop, a solution that also allows hearing aid wearers to use the system and they have tactile aids to facilitate operation of the controls by persons with impaired vision.

TAB 4.3

TAB JR.

INDOOR STATIONS
Tab 4.3 and Tab jr. with handset.
Simplicity at your hands.

With handset, Tab 4.3 with 4.3" display and Tab jr., solutions for every needs. The simplicity of these devices does not condition their purposes because they are equipped of all the video and intercom functions are needed.

Tab 4.3 - Colour LCD display.
The world outside the walls of your home has never been so bright and beautiful. The high-performance colour display that offers a perfect picture of the person at the door.

Tab 4.3 and Tab jr. - Capacitive keyboard.
Keys and controls flush with the surface with backlighting and differential reactivity to avoid accidental activation. The keys grant access to the primary video door entry functions: answering a call, opening the lock, self-start, ringtone mute, auxiliary service activation. Moreover, the answer call and open lock keys are easily recognisable even by the visually impaired.

Tab 4.3 and Tab jr. - Optical and audible signalling.
Crystal-clear sound and visual feedback confirm the activation of the functions, facilitating use for the visually impaired or hearing aid wearers too.

Tab 4.3 and Tab jr. - Accessibility.
Equipped with a teleloop, a solution that also allows hearing aid wearers to use the system and they have tactile aids to facilitate operation of the controls by persons with impaired vision.

Tab 4.3 and Tab jr. - No-nonsense speaker.
Its generous dimensions stand out on the video entryphone for an audio output as clear and free of disturbance as possible, for perfect, high-quality sound.

Tab 4.3 and Tab jr. - 10 different ringtones.
10 different default melodies to choose from: simply select your favourite and adjust the volume according to your requirements and the application contexts.

Tab 4.3 and Tab jr. - Alert notification.
It is possible connecting an external push button to send an assistance request as a priority to the concierge stations.

Tab 4.3 - Pan & Zoom function.
You can check the recording range of the outdoor station video camera which features the same function from the video entryphone.

INDOOR STATIONS
Voxie.
The new line of entryphones.

The Voxie entryphones blend in seamlessly with any architectural context. Simple shapes, slim silhouettes, ergonomic controls and with an elegant matt white finish. For those looking for a striking yet simple appearance and full functionality, which can easily be activated from the push buttons on the device. From adjusting the ringtones and the volume, to the door release button; the alarm indicator and the controls which can be programmed to suit individual requirements. There is even the possibility to make intercom calls if the building has more than one indoor station, such as in service industry facilities like offices, hospitals or production departments in a factory.

Voxie hands-free.
Is available for surface mounting with 7 push buttons and teleloop function

Voxie handset.
Is available for surface mounting with 2 push buttons (also in a version with teleloop) or 6 push buttons. To choose the functions to suit your individual requirements.

4 programmable push buttons to suit individual daily requirements.

Auxiliary function activation push button, such as switching on the light in the entrance hall.

Lock release command sending.
Thanks to the white signalling LED, in the Voxie Hands-free, if a sensor has been installed at the gate or at the main door, the door open is signalled.

Hands-free Push button.
To start and end the conversation, with white LED signalling that the conversation is under way.

Automatic answer.
Where activated, this function allows you to talk to the caller automatically without touching the entryphone.

One-way public paging.
The Paging function allows a group of indoor stations to ring and to make a one-way public paging on the speaker of the Voxie hands-free entryphone.

Audio volume and ringtone adjustment functions, also adjustable during a conversation.

Programmable melodies that can be differentiated for calls from an outdoor station, landing calls and intercom calls, depending on the models.

Alarm condition signalling, thanks to the red LED.

Outdoor stations, communicating is easy, effective and safe. As well as stylish.

The **entrance panels** are available in various dimensions and can be mounted in various ways, but they all have one thing in common:
an elegant and sophisticated design in keeping with the most demanding architectural requirements.
Surface mounting or flush mounting entrance panels, monobloc, modular or special flush with the wall. Their design can differ to accommodate any installation requirements, to blend in seamlessly with the building's existing style.

Pixel and Pixel Heavy.
Just 10 cm wide, affording simple installation in compact spaces.
In audio/video or audio only versions, Pixel and Pixel heavy are characterised by their extensive modularity which provides complete customisation, combining different types of push buttons and a 3.5" colour LCD display.

Pixel Up.
Entrance panel with front cover plate made of 316 stainless steel with brushed finish, distinguished by a linear design and by a reduced protrusion from the wall, of just 3 mm. With alphanumeric keyboard, with stainless steel buttons and colour display with polycarbonate protective glass, with IP54 degree of protection and IK08 impact resistance.

Steely.
Boasting a design that is trendy, linear and simple. It is the perfect solution for innovative environments complementing a comprehensive range of stylistic requirements, building types and functional needs. Steely by name, steel by nature. A simple, hard-wearing material that characterises the DNA of the entrance panel and complements its contemporary, modern and technological style.

Patavium.
Sinuous curves, beauty and sophistication, ideal for refined environments as it adapts to suit all types of architectures, particularly historical buildings. In brass with an elegant satin finish, also available on request in a polished version to enhance and endow every space with its very own personal form of expression.

Series 1200 and 1300.
With soft and modern silhouettes and a scratch-resistant finish, suitable for any domestic context.
Series 1200, in stainless steel with embossed surface and series 1300, in electro-polished anodised aluminium.

OUTDOOR STATIONS
Pixel e Pixel Heavy.
Beauty and strength.

Modular entrance panels with a slim, modern design, Pixel in aluminium with four colour variants: grey, white, slate grey and anodised grey, and Pixel Heavy in zamak, with a single special sable grey finish, which offers greater weather and impact resistance, with degree of protection IK09, IK10 and IP54, constitute a timeless entrance panel. Affording extensive modular design possibilities and freedom of composition, Pixel can be ordered specifically as you want it, responding perfectly to actual installation needs.

PIXEL

PIXEL HEAVY

Video camera with wide-angle lens.
The audio/video module has a video camera with a wide-angle lens and high-definition recording. A zoom function can also be set from the indoor stations, where multiple recording windows can also be browsed.

High sensitivity and automatic lighting control.
The sensor sensitivity recognises guests even in poor lighting. The luminous intensity of the lighting LEDs is automatically adjusted according to the surrounding luminous intensity.

Up to 4 push buttons in a single module.
The audio or audio/video module, which is the heart of the panel, comes with 4 push buttons in two rows for installation in small residential contexts.

Push buttons with LED backlighting.
The call buttons have LED backlighting with white LEDs for maximum readability of names. Backlighting and the intensity setting is controlled by the integrated dusk/dawn sensor.

Visual call signalling.
An LED on the front indicates calls in progress and any active communications, whether the lock control is enabled, or a missed call if the line is busy.

Echo canceller and noise reduction.
Echo Canceller means you can have a natural, two-way conversation, automatically avoiding annoying audio feedback (Larsen effect). You will hear loud and clear thanks to the Noise Reduction function.

Hard of hearing function and speech synthesis for visually impaired users.
The hard-of-hearing function allows hearing aid wearers to listen to the conversations directly in the hearing aid; the voice synthesis allows the blind and poor-signed to listen to a specially recorded vocal message reproduced by the entrance plate for each command.

Automatic gain control.
Sound levels are always outstanding thanks to automatic gain control (AGC) and voice activity detection (VAD).

Impact resistance and degree of protection.
Pixel is an aluminium panel affording a high degree of protection against atmospheric agents (IP54) and against impacts (IK08). Pixel Heavy in zamak is even more resistant, with IK09 and IK10 ratings.

Functional, ultra-slim design.
Being just 100 mm wide and protruding from the wall by just 14 mm (Pixel) or 18.5 mm (Pixel Heavy), the panel's small, shape-enhancing dimensions enable it to be mounted on metal pillars, making it the ideal solution for confined spaces.

Flexible, modular development, from 1 to 84 calls.
Pixel and Pixel Heavy can be used to create various combinations according to need, starting from 1, 2 and 3 modules vertically and up to 3 rows horizontally, for a composition of 9 modules and allowing up to 84 calls with rocker buttons.

Modular design.
Owing to the availability of different-sized push buttons, Pixel can be composed freely to accommodate specific installation requirements.

IP54 IK08

Pixel and Pixel Heavy.
Absolute modularity.

Installation to suit your needs.
Rapid front access to the audio/video unit and other expansion modules for routine maintenance without having to remove the panel completely from its mounting frame.

LCD colour display and contacts list with up to 6400 names.
With its 3.5" LCD colour display—the largest in the modular segment—and user-friendly navigation menu, it can manage up to 6400 names. Calls can be made by scrolling the contacts list or entering the required number. And with an 80° horizontal viewing angle, information can easily be read on the display even in direct sunlight.

Expansion modules.
Pixel is a dynamic solution, as it allows you to create all the compositions you need, using additional modules and combining audio or audio/video electronic units. Every panel can hold up to 5 button modules in a single row and 10 in a double row, complete with alphanumeric keyboard, display with electronic contacts list, or backlit name plate, biometric sensor or transponder.

Flush-mounting in series or surface mounting with rain-proof frame.
Pixel panels can be either flush mounting or surface mounting. In both cases, they guarantee great functional performance.
For mounting in series, the flush mounting boxes are fitted with a spacer that secures them tightly together. In Pixel entrance panels, it works like a cable outlet because the void, watertight interior guarantees total protection for the wiring. Furthermore, a cardboard antimortar cover protects them during installation. Flush mounting can be completed by adding the rain-proof frame which is incorporated into the surface mounting boxes.

Flush mounting boxes for Pixel panels

Flush mounting boxes for Pixel Heavy entrance panels

For installation with universal adaptors.
Universal adaptors are designed to mount Pixel and Pixel Heavy modular panels to replace and renovate an existing entryphone or video entryphone system. Being universal, these adaptors are totally compatible with the most widely available flush mounting boxes on the market.

Rain-proof frame
OUTDOOR STATIONS
Pixel Up.
Slim and strong.

Pixel Up is the entrance panel with front cover plate made of 316 stainless steel with brushed finish, with thin thickness and distinguished by a linear design and by a reduced protrusion from the wall, of just 3 mm. Available in the version with alphanumeric keyboard, stainless steel buttons and colour display protected by 5 mm thick polycarbonate glass, it has protection degree IP54 and protection degree IK08 for impact resistance. For flush mounting, the entrance panel is supplied with a stainless steel box, to which the cover plate is fixed using special anti-tamper screws.

Wide-angle camera.
Camera with high-definition wide-angle lens. Recording range can be controlled directly from the indoor station using the pan&zoom function.

Sensor: high-sensitivity and HDR.
The high sensitivity of the sensor allows you to see even in areas with low brightness. The High Dynamic Range (HDR) technology in fact allows you to identify the caller even in poorly lit areas.

Accessibility.
The display features high-contrast colours to facilitate name identification and improve reading. The device uses large-sized characters and symbols, so it can also be used by the visually impaired.

Backlit keyboard.
Backlit stainless steel keys with Braille codes featuring multitap function for rapid name search.

Automatic brightness setting.
The intensity of the LEDs used for lighting the video camera is self-adjusting according to the environmental light, to ensure optimal visibility of the caller and the surrounding area.

High performance 3.5" display.
Wide viewing angle and backlighting that allow easy reading of information even in bright light. 5 mm thick polycarbonate screen protector.

Composition.
The 405x145 mm cover plate is fixed to the mounting box (382.1x124.1x60 mm) with special steel anti-tamper 6 screws. It can also be surface mounted using the dedicated box with rain-proof frame.

Automatic gain control.
Thanks to automatic gain control (AGC), sound levels are optimised irrespective of the distance and tone of the speaker, of the devices called and of the complexity of the system. There is no need to adjust the gain.

Noise reduction and VAD.
You will hear loud and clear thanks to the noise reduction function and voice activity detection (VAD).

Echo canceller.
The echo cancellation algorithm means you can have natural, two-way conversations, automatically avoiding annoying audio feedback or whistling (Larsen effect), without having to adjust the microphone and speaker during installation.

Optical signalling.
The entrance panel operations are signalled by graphic icons on the display and by the LEDs on the front of the cover plate, which show the call under way, the line busy, the conversation and the lock opening.

Contacts list with up to 6400 names.
Thanks to a user-friendly navigation menu, the entrance panel can manage up to 6,400 names. Calls can be made by scrolling the contacts list or entering the required number.

Integrated teleloop.
Thanks to this technology, T-coil hearing aid wearer, can listen to conversations directly in their hearing aid.

Voice synthesis.
Entrance panel use by the visually impaired is facilitated, thanks to voice messages that guide the user step by step.

IP54 IK08

Pixel Up
In 316 stainless steel with various finishes:
stainless steel, black metal, champagne, copper and black painted.

Stainless steel | Black metal | Champagne | Copper | Black painted

Wide-angle camera.

Sensor: high-sensitivity and HDR.

OUTDOOR STATIONS
Steely and Patavium.
One design for every style.

2 DUEFILI PLUS

Two video door entry entrance panels, which differ in shape, finish and material, yet which have one thing in common: sophisticated design, in keeping with the highest architectural expectations. These are the assumptions on which the new Patavium is based, combining the charming appeal of brass with rounded, elegant and timeless silhouettes, and Steely, in steel, modern and linear. Perfect for interpreting all styling and functional requirements.

STEELY

PATAVIUM

Steely: modern appeal and impeccable styling.
Trendy, linear and simple. Three characteristics which - when combined with technological innovation - make Steely the perfect complementary feature for any building, accommodating all functional needs.

Made of steel, a simple, hard-wearing material that characterises the DNA of the Steely entrance panel and complements its contemporary, modern and technological style.

Patavium: everlasting appeal.
Golden reflections emphasise the sinuous curves for an ever trendy concept of beauty and sophistication. The brass used and the timeless design make it ideal in prestigious settings or combined with historical buildings.

In brass with an elegant satin finish, on request Patavium is also available in a polished version to enhance and endow every space with its very own personal form of expression.

Camera with manual vertical and horizontal tilt functions.
Lighting of recording area with white LED light.
Full duplex communication.
The internal and external volume, and the sound balance can be adjusted to obtain an optimum conversation volume.

Fully modular. Patavium and Steely can also be combined to suit individual requirements, placing the cover plates side-by-side horizontally, even vertically for Steely.

OUTDOOR STATIONS
1200 and 1300 series.
Modular and versatile.

Video door entry entrance panels, with common features yet with different materials, Series 1200 in stainless steel and series 1300 in anodised aluminium. In audio and audio/video version, to be completed with electronic units, to arrange multiple combinations and adapt to any lifestyle to perfection.
Series 1200 and 1300 can be composed as desired, choosing between the audio unit and the audio/video unit, expansion modules with push button modules, display and alphanumeric keyboard. In the series 1300 cover plates, the blank modules can be replaced with traditional push buttons and vice-versa, so you can compose your keyboard to your liking.

Series 1200: high performance and versatility.
Fine finishes, high-performing yet concurrently user-friendly technology. Series 1200 can be flush mounted or surface mounted and is also available in a reinforced version, in sable grey satin-finish paint, which is particularly weather-resistant and offers a IK10 degree of protection against impacts.

Series 1300: built to suit your needs.
Soft design with scratch-resistant finish. Made from 1.8 mm thick electro-polished anodised aluminium. Designed both for flush mounting and for surface mounting with a rain-proof frame.

Elvox Door entry

Quick guide to the right system solution

For renewing an existing or creating a new system it is necessary to define the type of system, to identify the various components required.

Audio-only system (Due Fili Plus).

Basic system components:
- Entrance panel.
- Power supply and indoor unit (audio).
- In "audio-only" system, the wiring of the devices (entrance panel, indoor unit, power supply unit, etc.) is linear (in-out) or star-wiring.

With single entrance panel.

ENTRANCE PANEL   POWER SUPPLY   INDOOR UNIT
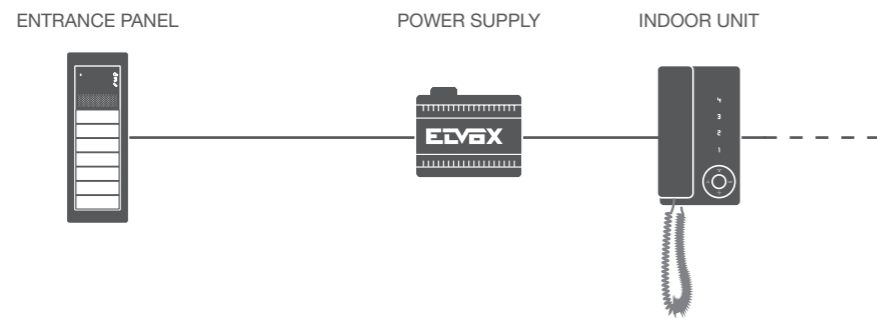

With multiple entrance panels.

ENTRANCE PANELS

POWER SUPPLY   INDOOR UNIT
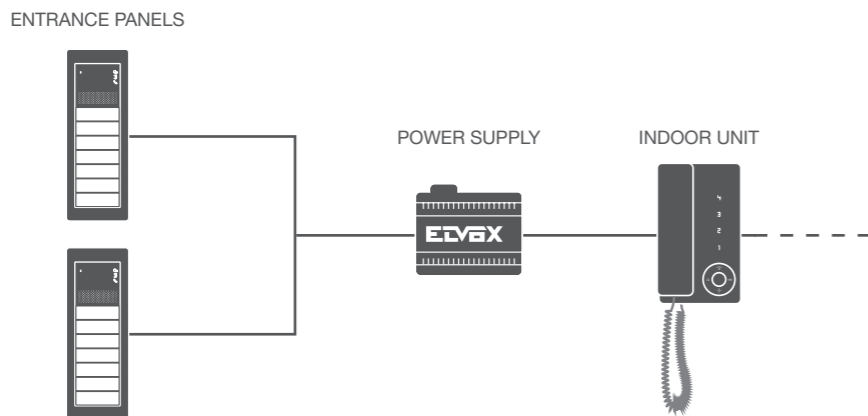

Quick guide to the right system solution

Mixed systems (Due Fili Plus).

Basic system components:
- Entrance panel.
- Power supply and indoor units (audio + video).
- Linear wiring (in-out, no additional device needed).

In mixed systems (audio+video), for solutions with multiple audio and video external units, the concentrator is required.
In the case of indoor units, on the other hand, installations may use:
- Linear wiring (in-out, no additional device needed).
- Concentrator (combines multiple inputs).
- Wiring with floor distributor, allowing 4 outputs to be taken off the riser.

With single entrance panel.

ENTRANCE PANEL   POWER SUPPLY   INDOOR UNIT
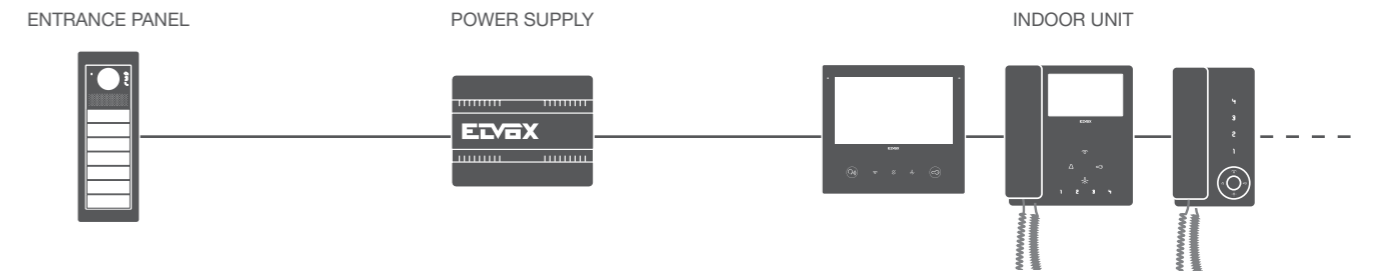

With more than one entrance panel and in-out wiring.

ENTRANCE PANELS

CONCENTRATOR   POWER SUPPLY   INDOOR UNIT
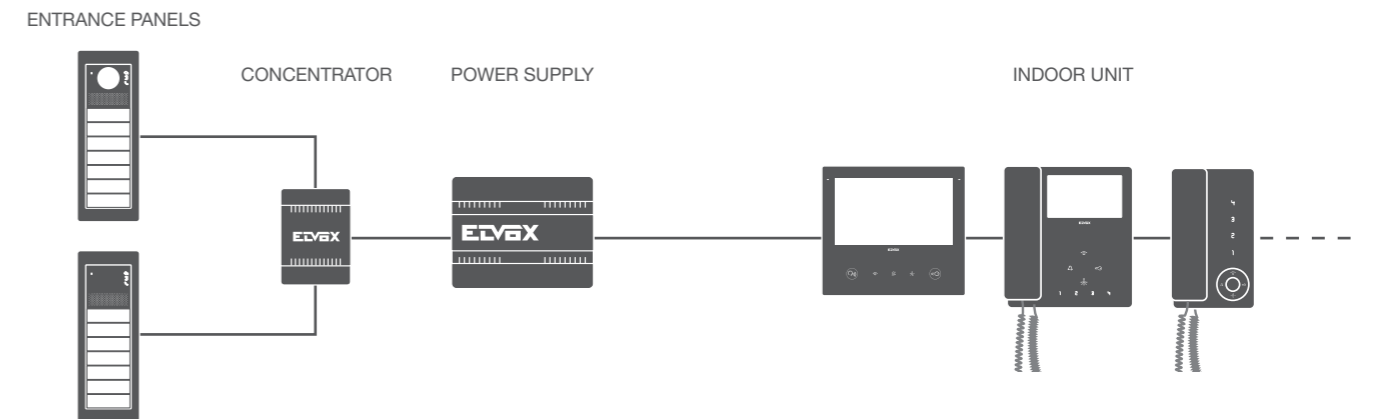

With more than one entrance panel and floor distributor.

ENTRANCE PANELS

CONCENTRATOR   POWER SUPPLY

INDOOR UNIT

DISTRIBUTOR

INDOOR UNIT
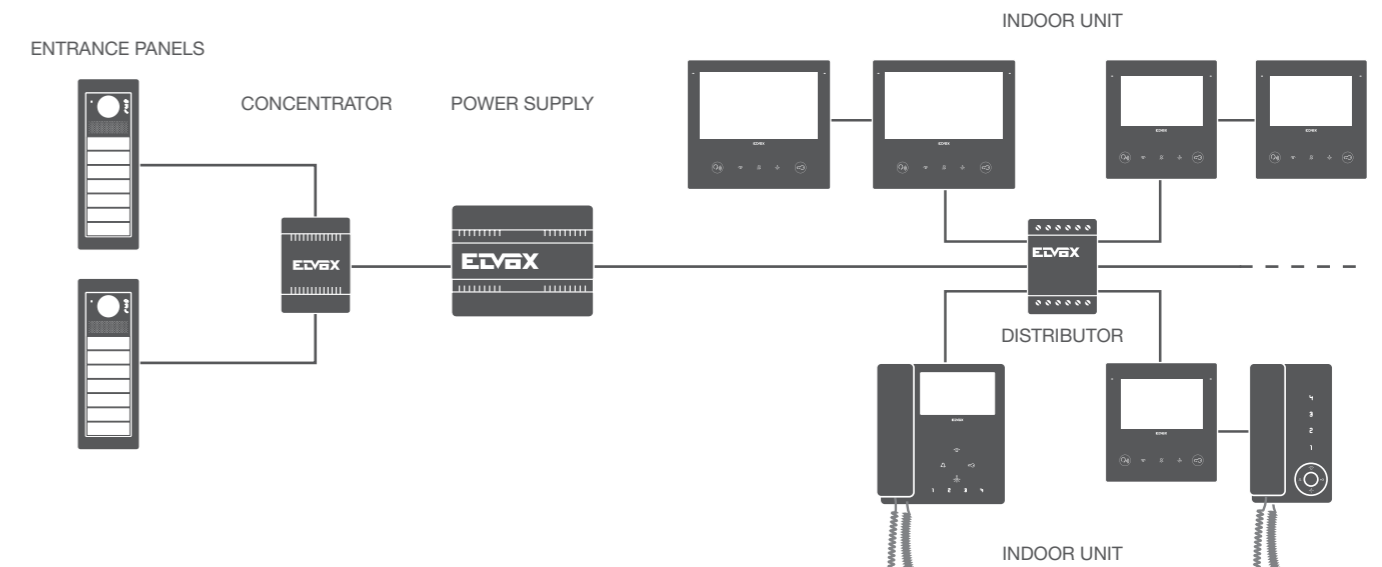

When set up a new systems or updating existing systems, the system type must be defined in order to identify the various components required. The components for each type of system can be fitted within certain distances, as follows:
- system components:
  • maximum distance between the indoor unit and the furthest entrance panel;
  • maximum distance between the entrance panel and the power supply;
- type and length of the cable.

The diagrams below show various system types, each indicating the relevant thresholds to be observed.

Type of cable

CABLE	ARTICLE	UNDERGROUND	AUDIO SYSTEMS	MIXED SYSTEMS
Elvox - section 1 mm^2	732I.E.100, 732I.E.500	Yes	Recommended	Recommended
Elvox - section 1 mm^2	732H.E.100, 732H.E.500	No	Recommended	Recommended
Cat.5/6		No	Yes	Yes
Twisted phone 0.28 mm^2		No	Yes	Yes
Single > 0.2 mm^2 *		No	Yes	Yes

also refers to cables for alarm systems

Elvox IP video door entry system with wired inner units

The system guarantees the functions described using the articles in the catalogue for all the following cases, also in combination:
- installation with less than 200 connected devices, i.e. objects connected to the same LAN network via an RJ45 interface, do not calculate IP CCTV cameras and switch;
- installation with up to maximum 3 video reception switchboards;
- management of access control services with standard articles from the catalogue up to 500 users;
- management of up to a maximum 10 video answering machine messages for each reception switchboard installed.

For all other cases and for the integration of third party products/ systems, such as VoIP devices with SIP protocol, IP CCTV systems, advanced access control systems, please contact the sales network to consider customized solutions agreed with the system managers. The IP CCTV cameras can not be installed with the entrance panel to operate as call function service.

## Elvox IP riserless video door entry system with call service via Cloud

The system guarantees the functions described using the articles in the catalogue for all the following cases, also in combination:
- installation with less than 200 connected devices, i.e. objects connected to the same LAN network via an RJ45 interface, do not calculate IP CCTV cameras and switch;
- installation with network server for more than 200 devices connected to LAN network.
  The files are available and free for download on www.vimar.com;
- installation with maximum 16 riserless IP gateways for IP video door entry system to Vimar Cloud connection; each riserless IP gateway manages up to 100 calls and for each call it is matchable up to 5 mobile with View app, which answer to the same call simultaneously
- calls towards the mobile devices are possible with the licenses installation and the authorization by the plant manager;
- installation can be managed from porter video switchboard;
- management of access control services with standard articles from the catalogue up to 1600 users;
- management of up to a maximum 10 video answering machine messages for each reception switchboard installed.

For all other cases and for the integration of third party products/ systems, such as VoIP devices with SIP protocol, IP CCTV systems, advanced access control systems, please contact the sales network to consider customized solutions agreed with the system managers. The IP CCTV cameras can not be installed with the entrance panel to operate as call function service.

Switch for the Elvox IP video door entry system

The Elvox IP video door entry system should be completed with switch that manages the traffic of the LAN network. For a correct system operating, it is recommended the use of switch conform to the network characteristics of the current catalogue.

Installation of the passive network

To realize the infrastructure of passive network for the IP video door entry system, it is recommended to install the Vimar Netsafe structured cabling system with a wide range of products able to realize networks in 5e, 6 and 6A categories, shielded or unshielded in copper or fiber optic connections.
A system with great performances, offering versatile solutions for wide-ranging installations and assuring steady connections over time and for every kind of buildings, from the smallest in residential sector to the biggest to the tertiary sector.
For more information browse on the site www.vimar.com.

Quick guide to the right system solution

Elvox IP video door entry system

The system guarantees the functions described using the articles in the catalogue for all the following cases, also in combination:
- installation with less than 200 connected devices, i.e. objects connected to the same LAN network via an RJ45 interface, do not calculate IP CCTV cameras and switch;
- System operating in combination with an SIP server;
- Licences for activating audio or audio/video calls to SIP devices;
- management of access control services with standard articles from the catalogue up to 500 users;

For all other cases and for the integration of third party products/systems, such as VoIP devices with SIP protocol, IP CCTV systems, advanced access control systems, please contact the sales network to consider customized solutions agreed with the system managers. The IP CCTV cameras can not be installed with the entrance panel to operate as call function service.

Switch for the Elvox IP video door entry system

The Elvox IP video door entry system should be completed with switch that manages the traffic of the LAN network. For a correct system operating, it is recommended the use of switch conform to the network characteristics of the current catalogue.

Installation of the passive network

To realize the infrastructure of passive network for the IP video door entry system, it is recommended to install the Vimar Netsafe structured cabling system with a wide range of products able to realize networks in 5e, 6 and 6A categories, shielded or unshielded in copper or fiber optic connections.
A system with great performances, offering versatile solutions for wide-ranging installations and assuring steady connections over time and for every kind of buildings, from the smallest in residential sector to the biggest to the tertiary sector.
For more information browse on the site www.vimar.com.
